

Automatic Hand Sanitiser Dispenser

Sanitising

Product Code: 3570-02

WESTMINSTER
GROUP PLC

Key Features

900 ml Sanitiser Capacity

10 cm Sensing Distance

1 or 2 Sanitiser Shot Setting

Low Liquid Indicator

Simple to Install & Refill

4x AA Batteries Required

Overview

Westminster provide a range of disinfecting & sanitising equipment to help fight deadly microbes including COVID-19. The range of equipment includes UV-C sanitising technology and alcohol-based solutions.

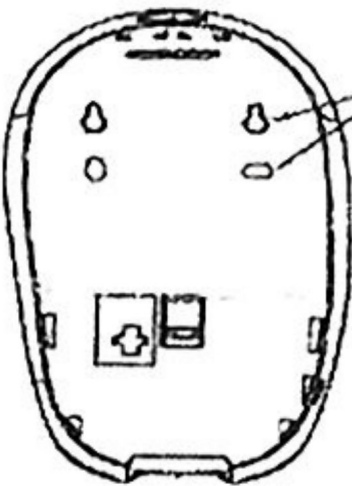

The Automatic Hand Sanitiser Dispenser is an ideal hand sanitising solution. The sensor will activate only around the sensing area of up to 10 cm, dispensing either one shot of sanitiser or two, depending on your preference setting.

Low battery, low liquid and product malfunction indicators will flash red or green to alert you of any maintenance required. The Dispenser is also easy to install provided the dispenser is at least 10 inches above any counter top surface; giving you two options for mounting on either textured surfaces (screw mounting), or tape mounting for smoother surfaces.

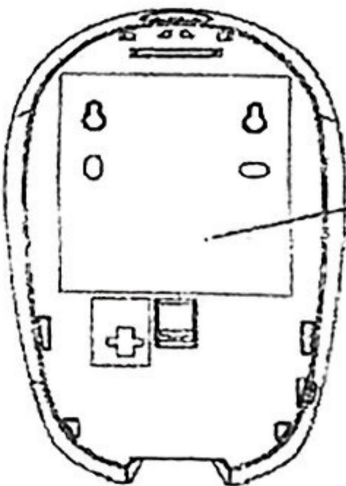

Product Specification

General

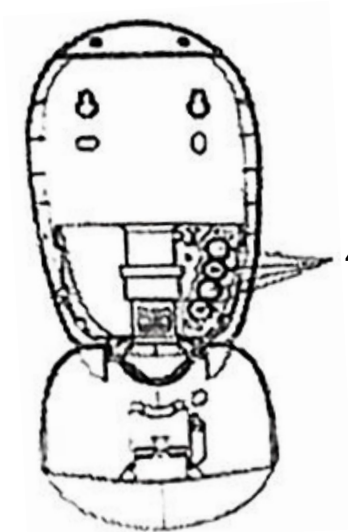

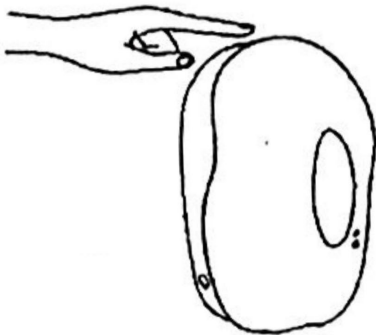

Dimensions	25 x 15 x 10 cm
Battery	Alkaline AA 1.5 V
Battery Life	>20,000 times per shot, standby mode 2 years
Volume	0.4 ml per shot
Speed	0.6-0.8 seconds per shot
Sensing Distance	1-10 cm

Screw mounting holes for installation on porous or textured surfaces

Tape pad for mounting on smooth surfaces

4x AA Batteries Required
