Product Code: 2040-50

WESTMINSTER
GROUP PLC

Benefits

Single Step Collection & Analysis

Less Than 20 Seconds to Result

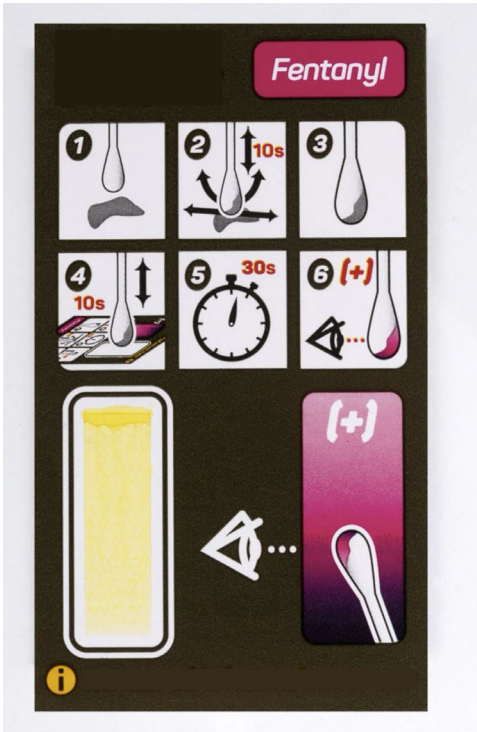

Tests Liquid, Solid & Residue

Lightweight, Durable & Non-Hazardous

Individually Sealed

Overview

The Westminster Fentanyl+ Test Kit is designed to screen for fentanyl and fentanyl analogues in any sample. The kit screens for Fentanyl + Major Fentanyl Analogues and other select high-threat narcotics, including select Opioids and Amphetamines.

The test kit can be used on both liquid and solid samples in pure form or clandestine mixes with other narcotics. Samples may appear as white to off-white fine powders to crystalline grains, may be dissolved as a liquid or gel, and can be found in commercial pharmaceutical products.

Features

As Little As 3 µg Presence Detection

Test Strip Measures 2 x 0.5 Inches of Reinforced Paper
