

Biogas 21

Plaxton Bridge Project Update

November 2017

SOLAR|21

Project Summary

- Construction of 2.7MW Anaerobic Digestion plant in Woodmansey near Hull
- Full planning permission (14/11/2016)
- Feedstock – potato processing waste from adjacent plant
- Engineering Procurement Construction Contractor – BTS Biogas
- Grid connection secured with Northern Gas Networks
- UK Government backed revenue - RHI (Renewable Heat Incentive)

Planning

- Full planning permission granted 14th November 2016 by East Riding of Yorkshire Council.
- Northern Planners currently engaged to address pre-commencement planning conditions
 - Estimated to be completed December 2017

- Northern Gas Networks (NGN) have provided an indicative timeline of between Q3 to Q4 for grid connection 2018.
- NGN have set out 3 major project/payment milestones.
- First milestone payment to NGN has been completed.

Gas Grid Connection

Construction

BTS Biogas

- Primary EPC contractor selected.
- BTS will provide construction and performance guarantees underwritten by a major European financial institution.
- Timelines for procurement of major components confirmed. Plan to commence procurement by January 2018.

Ashcourt Civil Engineering

- Contractor selected for civil works (previous partner experience on Tansterne Biomass plant).
- Reporting to BTS Biogas who retain overall responsibility and guarantees for successful delivery of the project.

Mason Clarke Associates

- Civil engineers engaged to complete site survey and pre-commencement works.
- Site survey in progress week of 6th November.

Feedstock

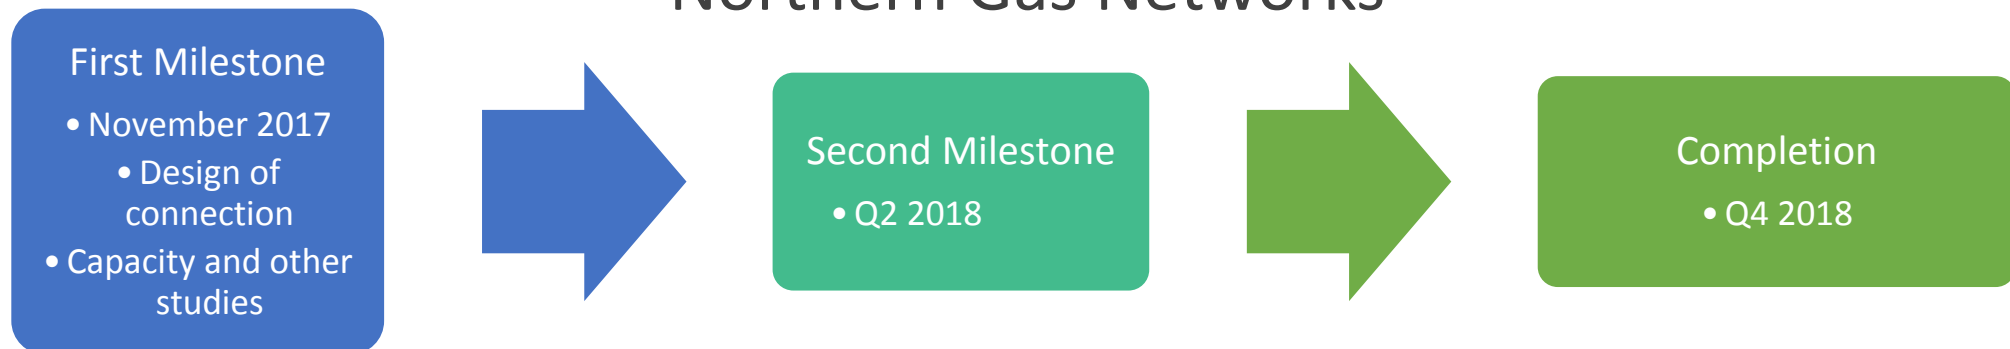

- 4 U Fresh Produce will supply the majority of the feedstock
- Located directly adjacent to the plant site thus reducing impact of deliveries on local community
- Any additional feedstock required will be sourced from potato farmers in the area. It will consist of on-farm waste not suitable for sale.

Summary Project Timeline

BTS Biogas

Northern Gas Networks

Note: all times are current estimates and subject to change. Gas grid connection based on current commitments from NGN, subject to change.

Outlook

Estimated completion of the plant Q4 2018

Exit planning (re-finance and/or sale) 2019

Investor exits expected from 15th May and 15th June 2020
