

CORPORATE OVERVIEW

Shippers looking to find the best carrier rates, manage a growing logistics operation, or discover new efficiencies in a sophisticated supply chain, can leverage Kuebix to take control of and optimize their supply chains.

Trimble's acquisition of Kuebix in January 2020 is enabling the connection of Trimble's network of private fleets and commercial carrier customers, which collectively represent more than 1.3 million commercial trucks in North America, with Kuebix's extensive community of more than 25,000 shipping companies. Together, Kuebix and Trimble are creating the industry's most powerful connected platform for planning, execution and freight demand-capacity matching.

It all starts with Kuebix's transportation management system (TMS), where shippers and carriers work together in the cloud to dynamically plan and execute their logistics operations. Kuebix's wide variety of modular features include a suite of enterprise applications and integrations with ERP systems.

With rapid-onboarding and an intuitive UI, shippers can immediately realize savings while managing their freight and carriers more efficiently in the cloud.

THE KUEBIX ADVANTAGE

MODULAR. SCALABLE. RAPID ONBOARDING.

Cloud Based, Scalable,
Secure w/ Integration to all
Systems

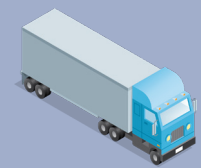

Modular Suite of
Enterprise Applications

Built in Load
Matching Platform

True SaaS Product Set
& Strategy

Simple UI
& Rapid Onboarding

Financial Management Down
to the SKU Level

All Modes

INDUSTRIES WE ARE PROUD TO SERVE

MANUFACTURING

"We started with Kuebix as a trial and saw a savings of approximately \$20,000 in that first month compared to the way we had been shipping. The immediate cost savings were incredible!"

- Marc Orlando, Logistics Manager,
Bizerba USA

WHOLESALE AND DISTRIBUTION

"Kuebix gives our warehouse associates the ability to see the least expensive but most efficient way to ship our product. We use Kuebix's auditing feature to automate managing our freight spend and we have seen significant time savings!"

- Michele Morelli, Controller, Holman
Parts Distribution

FOOD AND BEVERAGE

"With Kuebix, we've been able to eliminate paper chasing and get real time information on overall performance. This has resulted in increased efficiencies in our logistics planning process and increased overall visibility into our operations."

- James Osborn, Logistics and
Process Improvement Manager,
Hanover Foods

RETAIL AND E-COMMERCE

"Kuebix has become the foundation of our managed transportation services program for all inbound shipments. Kuebix has provided us the necessary information for all stakeholders to operate at the highest level of efficiency."

- Wayne Bailey, SVP of Supply Chain
and Logistics, Weis Markets

CHEMICALS

"Kuebix is packed with features and we immediately realized savings through rate comparison and the ability to easily request spot quotes. We are now able to create numerous shipment reports including a quote report for accounts payable to quickly audit every invoice, and a carrier performance report that allows us to maintain superior customer satisfaction."

- Mike Koehler, Transportation
Manager, Polytek

QUICK FACTS ABOUT KUEBIX
