Commercial vehicle navigation built to keep your fleet safe, compliant and efficient

MINI GUIDE

# Your Fleet's **Safety** is Our Mission

**ENTERPRISE  
FLEET  
NAVIGATION**

CoPilot provides a comprehensive, cost-effective fleet solution that ultimately connects the back office to the in-cab navigation

## Keep Your Drivers Safe

- ▶ Non-distracting, driver-friendly user interface
- ▶ Clear 3D and 2D map views plus Driver Safety View for at-a-glance instructions to reduce in-cab distraction
- ▶ Advance notice of upcoming lane changes with lane assist guidance and real road signage
- ▶ Prevent driver interaction when the vehicle is in motions with Driver Lock

## Keep Fleets Efficient with Lower Miles & Optimal Fuel Usage

- ▶ On-board navigation for constant access to reliable routing
- ▶ Fast, automatic route generation and re-calculation directly on the device
- ▶ Options to integrate with workflow and dispatch applications to prevent incorrect address entry and reduce driver stress
- ▶ Build single or multiple destination routes and optimize up to 50 stops

## Keep Drivers Compliant

- ▶ Profile options for the entire fleet with settings for Heavy, Medium and Light Duty vehicles
- ▶ Detour function quickly identifies and alternative truck-legal route
- ▶ Posted speed limit display plus audio and visual alerts notify a driver when they have exceeded the speed limit
- ▶ Keep drivers safe and legal with load specific routing based on 7 Hazmat categories and ADR tunnel codes

## Back Office Companion Solutions for Unified Results

Connecting the back office to the cab is critical for a successful deployment of in-cab navigation. Streamline your operations company-wide by extending the same commercial routing algorithm powering your in-cab navigation to your back office planning, visualization and reporting tools.

Web-based Remote Configuration

Create, Manage & Sync Custom Location Content

Route Visualization & Reporting

Routing, Mileage & Mapping

## YOUR IN-CAB ALLY

CoPilot's advanced navigation features do the hard work, allowing drivers to do what they do best – drive.
