Ground Bar

Connect Fortress Plastic Pedestals offer solutions for a wide range of scenarios. Made with a high impact co-polymer polypropylene, the Fortress pedestal is UV, impact, and crush resistant.

The stake mount version has a flared plastic base providing increased stability in new construction with more room to store drop cables and conduit systems.

The vault assembly pedestal provides the same installation options as the stake mount version with the added advantage of having extra storage space in a vault below. The Pedestal can be installed with the vault installation, or is available for future upgrades of existing vault locations.

A 4-Post ground bar is provided on the pedestal frame and a ground plate can be supplied for both versions.

#### Applications

- FTTH Splice and distribute pedestal location
- Bring Splice FOSC above ground
- Cable Slack Storage Location, for conduit installs
- Upgrade an existing cable location, providing extra depth for short stubs

#### Advantages

- Moulded anti-theft/anti-insect louvers
- Patented SlamLock™ system for guaranteed locking
- 360° access makes installation and maintenance easy
- Temporary drop knock outs
- Universal Fiber Management Mounting Plate

#### Grounding Options

- Ground Bar pre-installed
- Ground Plate with Copper Lead Jumper (Can be supplied)
