

God's Will For My Work

What is good about my work? (Creation Design)

How does the industry that I work in serve God's purposes? How does my business serve God and His creation (people, the earth, and local community)? How does my work make me a co-creator with God?

What is wrong with my work? (Impacts of the Fall)

How has the fall impacted the industry? What brokenness (problems, struggles, and ways that do not honor God) exists in the industry, local business, and even in my life in daily work?

What needs to change about my work? (Redemption/Renewal)

What things need to change in the industry and local place where I work? What three or four things are necessary for the industry to change to align with God's will? How might I go about joining God in redeeming what is wrong?
