Application for a Permit to Install or **Alter** a Septic Tank System

Environment Protection Act 1970

There are some hard words in this form. The hard words are in **blue**. You can read what they mean on page 11.

Applicants should make sure that the property owner gets a copy of this application.

New installation <input type="checkbox"/> application fee \$723.90	Alteration <input type="checkbox"/> application fee \$551.70

Building Surveyor Details

Name:	
Phone number: Work:	Mobile:
Email address:	Fax:
Do you want Council to notify your building surveyor when the permits are issued? <input type="checkbox"/> Yes <input type="checkbox"/> No	

Proposed System

How many proposed bedrooms in the dwelling?	
What type of water supply is there?	<input type="checkbox"/> Town <input type="checkbox"/> Private: _____
Is there a river or creek along the boundary of the property?	<input type="checkbox"/> Yes <input type="checkbox"/> No
Is there a spa?	<input type="checkbox"/> Yes <input type="checkbox"/> No
If yes, how many litres does it hold? _____	
Does the property have bore water?	<input type="checkbox"/> Yes <input type="checkbox"/> No
Are there any nearby dams?	<input type="checkbox"/> Yes <input type="checkbox"/> No
Is there an Insinkerator?	<input type="checkbox"/> Yes <input type="checkbox"/> No
How many litres can the septic tank hold?	
How large are the effluent lines or irrigation area for disposal? _____ metres square	
Trench length: _____ metres Trench depth: _____ metres Trench width: _____ metres.	

Application checklist:

- The correct fee has been paid or payment enclosed
- A site plan has been attached and agreed to and signed by the plumber and property owner
- A locality plan has been attached (directions of how to get to property)
- A copy of [Land Capability Assessment](#) is attached
- A full copy of current title for the property is attached
- Copy of certificate of conformity (Aerated wastewater systems only)

I/we agree that we have read and understood the [requirements](#) of this application and all information given is correct.

Locality Plan

(How does someone get to your property?)

Please show the location of the property, including the street or lot number and the distance to the nearest major road.

Under *Part IXB of the Environment Protection Act 1970* a 'Permit to install or **alter** a septic tank system' must be **obtained** from Council before installing or **altering** any part of a septic tank system. A 'Permit to Use a Septic Tank System' must then be issued before the system is used and an **occupancy** permit **obtained**.

Only septic tank systems that comply with Australian Standards 1546.1 to 1546.4 will be approved. The four approved types are:-

- AS/NZS 1546.1 – Septic tanks
- AS/NZS 1546.2 – Waterless composting toilets
- AS/NZS 1546.3 – Aerated wastewater treatment systems
- AS/NZS 1546.4 – Domestic greywater treatment systems (note that this standard is not yet ratified)

Aerated wastewater treatment systems must be certified by an accredited conformity assessment body (CAB) as conforming to AS/NZS 1546.3 and AS/NZS 1546.4

The form should be fully completed, signed and returned to the Shire with:

1. The correct fee paid or payment enclosed
2. A site plan agreed to by the plumber and property owner
3. A locality plan attached
4. A copy of [Land Capability Assessment](#)
5. A full copy of current title for the property
6. Copy of certificate of conformity (aerated wastewater systems only).

Privacy Statement

Follow us on Twitter @egsc

Telephone: (03) 5153 9500
Fax: (03) 5153 9576
National Relay Service: 133 677
Residents' Information Line: 1300 555 886
ABN: 81 957 967 765

If the details are correct, and the application and plans are approved, a "Permit to install or **alter** a septic tank system" is issued. There will be certain **requirements** attached to this permit.

The installation of the septic tank system must be completed within 2 years of the date of the permit for installation or **alteration** being issued. If the system is not complete after 2 years a fee of 50% of the current application fee will be charged for renewal.

In order for the Septic Tank System Application to be processed, all the above steps (1 – 6) must be completed. Failure to submit needed information will result in processing delays.

Septic Tank Systems

A septic tank system is defined as including any system for the **bacterial, biological, chemical** or physical treatment of **sewerage**, and includes all tanks, beds, sewers, drains, pipes, fittings, **appliances** and land in connection with the system.

Septic tank systems must be installed and maintained in accordance with the *EPA Septic Tanks Code of Practice (Publication 891.4, July 2016) (the 'Code')*, the Australian Standard and East Gippsland Shire Council **requirements**. They must be of a type that treats and contains all wastewater on site.

Other septic tank systems include treatment plants and **composting** toilets. Each of these systems have a certain Australian Standards, and must be installed and maintained in line with the **manufacturers'** instructions and any specific Shire **requirements**.

Alterations to Existing Septic Tank Systems

An **alteration** is anything that will impact on or **alter** the operation of the existing septic tank system. **Alterations** can include adding extra bedrooms to a house, flats to a property or wanting to relocate **effluent** lines or **irrigation** areas.

A permit to **alter** is needed from the Shire and, depending on the nature of the **alteration**, a **Land Capability Assessment** and certain works may be needed. It is suggested that you contact Council's Environmental Health Unit to discuss any proposed **alteration** to a septic tank system.

Plans

A plan of how to find the property and a site plan must be given with this application. The site plan on the application form **must** include:

- a) The signatures of the property owner and the plumber.
- b) The location of the premises including the street or lot number.
- c) The **dimensions** of all boundaries and the location of all streets which join the property.
- d) The location and **dimensions** of all proposed and existing buildings, the location of any streams, watercourses, gullies, dams, ponds, **bores** or wells for domestic supply, water tanks, driveways, swimming pools, **excavations**, water, phone, gas, and electrical trenches and any existing septic tank and **sullage** systems.
- e) The location and layout of the proposed septic tank system including all pits, trenches, tanks etc.
- f) The position of north, current wind direction and fall of the land.

If all of the above are not given then there will be delays in having the application processed and a permit issued.

Privacy Statement

The East Gippsland Shire Council asks for details about you to collect rates, approve permits and licences, and run a range of community services. The information you give to us on this form is used only for the reasons set out in the form and is not given to anybody else. Sometimes we may supply details about you to someone else, but only if we are allowed by law, or to protect someone or property.

When information is given out, Council will always try to make sure your privacy is protected in line with the *Privacy and Data Protection Act 2014*. You may ask for more information about Council's Privacy Policy by contacting our Information Privacy Officer on 03 5153 9500 or e-mail feedback@egipps.vic.gov.au

East Gippsland Shire Council

273 Main Street (PO Box 1618)
Bairnsdale Vic 3875
Website www.eastgippsland.vic.gov.au
Email feedback@egipps.vic.gov.au
Follow us on Twitter @egsc

Telephone: (03) 5153 9500
Fax: (03) 5153 9576
National Relay Service: 133 677
Residents' Information Line: 1300 555 886
ABN: 81 957 967 765

Installation Requirements

All installations shall meet with the EPA *Code of Practice 891.4*, the relevant *AS/NZS 1547:2012 On-site Domestic-Wastewater Management* and *AS 3500 National Plumbing and Drainage Code*.

All plumbing and drainage work must be done by a registered plumber. A Council's licensed plumbers Certificate of **Compliance** and "as installed" plan must be completed by the plumber and submitted to Council before the issue of the "permit to use". The Certificate of **Compliance** form is given to the plumber when the septic system is installed and inspected by Council, a copy of the permit requirements is also sent to the plumber when the Permit to install is issued.

Food waste disposal units are not recommended for use with septic tank systems. If a food waste disposal unit is used in a household situation an extra 700 litres capacity will be needed for sludge storage in the primary septic tank.

Spa baths over 200 litre capacity are not to be connected to the primary septic tank but are to be directed into a **rubble** pit of minimum dimensions 1 cubic metre or as stated in the permit requirements. **Rubble** may include broken bricks, stone **aggregate** or other rock.

Land Capability Assessment

A **Land Capability Assessment** (LCA) is required to be carried out under the *Code of Practice* and this may include soil **percolation** tests within the disposal site. They are not usually needed for **alterations** to septic tank systems. If the **alteration** does not need the substantial modification of the existing septic tank system.

The **LCA** is to be carried out by a qualified assessor who will recommend a design for **effluent** disposal, based on the results of the test. When selecting a consultant, consider their experience as a soil specialist, their knowledge of land assessment, their qualifications for land assessment, and do they have enough professional indemnity insurance. Make sure that the assessor you employ is aware of, and will follow the EPA and Shire guidelines for **LCA's**.

The **Land Capability Assessment** forms part of the application and must be attached.

Inspections

Three inspections of the site and the septic tank system may be needed.

- 1) An inspection of the proposed site, after Council receive the application and fee and before works start.
- 2) An inspection of the septic tank system prior to backfilling.
- 3) In some circumstances a final inspection when the system is completed prior to a "Permit to Use".

If more inspections are needed there will be an extra fee.

No backfilling shall be done without the approval of the Environmental Health Officer.

Inspections of Septic Tank installations need at least 2 working days' notice.

Inspections may be arranged by calling Council on (03) 5153 9500 or 1300 555 886.

If an inspection is not needed you must tell Council straight away.

Privacy Statement

The East Gippsland Shire Council asks for details about you to collect rates, approve permits and licences, and run a range of community services. The information you give to us on this form is used only for the reasons set out in the form and is not given to anybody else. Plumbing

All plumbing works to a septic tank system are set by the *Plumbing Industry Commission Self Certification Scheme* (Phone 03 5143 3021). All plumbing works must meet with *Australian Standard 3500*. When selecting a plumber they need to be licenced with the *Plumbing Industry Commission (Victoria)* - and you should consider their knowledge and experience in installing septic tank systems.

Setbacks

Even with every effort there are situations where wastewater has the potential to pollute. The consequences and impact of such pollution will depend upon the situation and the use affected.

The setbacks listed in the *EPA Septic Tanks Code of Practice (Publication 891.4, July 2016)* are standard minimum values for separation buffer distances between the wastewater disposal field (where treated effluent is applied) and other specific sites and sensitive features. The buffer distances are independent of other setbacks that may apply to the development.

The following Setback distances are taken directly from the *EPA Septic Tanks Code of Practice (Publication 891.4, July 2016)*. For further information refer to the code.

Setback distances for primary and secondary treatment plans and effluent disposal/irrigation areas in sewered and unsewered areas (where applicable) ^{1,2,6,10}

Landscape feature or structure	Setback distances (m)	
	Primary sewage and greywater system	Secondary sewage & greywater effluent
Building		
Wastewater field up-slope of building ⁷	6	3
Wastewater field down-slope of building	3	1.5
Wastewater up-slope of cutting/escarpment ¹²	15	15
Allotment boundary		
Wastewater field up-slope of adjacent lot	6	3
Wastewater field down-slope of adjacent lot	3	1.5
Services		
Water supply pipe	3	1.5
Wastewater up-slope of potable supply channel	300	150
Wastewater field down-slope of potable supply channel	20	10
Gas Supply pipe	3	1.5
In-ground water tank ¹⁴	15	7.5
Stormwater drain	6	3
Recreational areas		
Children's grassed playground ¹⁵	6	3 ¹⁶
In-ground swimming pool	6	3 ¹⁶
Surface waters (up-slope of :)		
Dam, lake or reservoir (potable water supply) ^{8, 13}	300	300 ⁴
Waterways (potable water supply) ^{9, 13}	100	100 ^{4, 5, 17}
Waterways, wetlands (continuous or ephemeral, non-potable); estuaries, ocean beach at high-tide mark; dams, lakes or reservoirs (stock and domestic, non-potable) ^{8, 9}	60	30
Groundwater bores		
Category 1 & 2a soils	NA ¹¹	50 ¹⁹
Category 2b to 6 soils	20	20
Watertable		
Vertical depth from base of trench to the highest seasonal water table ¹⁸	1.5	1.5
Vertical depth from irrigation pipes to the highest seasonal water table ¹⁸	NA	1.5

Notes to above table:

- Distances must be measured horizontally from the external wall of the treatment system and the boundary of the disposal/irrigation area, except for the 'Watertable' category which is measured vertically through the soil profile. For surface waters, the measuring point shall be from the 'bank-full level'.
- Primary water-based sewerage systems must only be installed in unsewered areas; secondary sewerage systems must only be installed and managed in sewered areas by Water Corporations; secondary greywater systems can be installed in sewered and unsewered areas.

3. Advanced secondary treated greywater of $\leq 10/10/10$ standard.
4. The setback distance in a Special Water Supply Catchment area may be reduced by up to a maximum of 50% conditional on the following requirements (otherwise the setback distances for primary treatment systems apply):
 - effluent is secondary treated to 20/30 standard as a minimum;
 - a maintenance and service contract, with a service technician accredited by the manufacturer, is in place to make sure the system is regularly serviced in line with Council Septic Tank Permit conditions and
 - Council is satisfied the reduction in set-back distance is necessary to permit the correct development of the site and that risks to public health and the environment are minimised.
5. The setback distance in a Special Water Supply Catchment area may be reduced by up to a maximum of 50% conditional on the following requirements (otherwise the setback distances for primary treatment systems apply):
 - effluent is secondary treated to 20/30 standard as a minimum;
 - a maintenance and service contract, with a service technician accredited by the manufacturer, is in place to ensure the system is regularly serviced in accordance with Council Septic Tank Permit conditions and
 - Council is satisfied the reductions in set-back distance is necessary to permit the appropriate development of the site and that risks to public health and the environment are minimised.
6. Effluent typically contains high levels of nutrients that may have a negative impact on native vegetation and promote the growth of weeds. When determining setbacks, Council should consider not only the potential impact of nutrients from the proposed onsite wastewater management systems, but the cumulative impact of the existing onsite wastewater management systems in the area.
7. Setting up an effluent disposal/irrigation area upslope of a building may have implications for the structural integrity of the building. This issue is beyond the scope of this Code and should be examined by a building professional on a site-by-site basis.
8. Does not apply to dams, lakes and reservoirs located above ground-level which cannot receive run-off.
9. Means a waterway as defined in the Water Act 1989.
10. The setback distances for flat land are equivalent to 'down-slope' setback distances.
11. A cutting or escarpment from which water is likely to emanate.
12. Applies to land, next to a dam, lake, reservoir or waterway that provides water for a public potable water supply, which is:
 - a. Applies to land, next to a dam, lake, reservoir or waterway that provides water for a public potable water supply, which is: subject to a Planning Scheme Environmental Significant Overlay (ESO) that shows maintenance of water quality as the environmental goal to be achieved (contact the relevant Water Authority to decide whether the ESO is in a potable water supply catchment);
and/or
 - b. within a Special Water Supply Catchment Area listed in Schedule 5 of the Catchment and Land Protection Act 1994.
It is recommended that any primary or secondary treatment system and its associated land application system are installed down slope of an in-ground water tank.

Privacy Statement

The East Gippsland Shire Council asks for details about you to collect rates, approve permits and licences, and run a range of community services. The information you give to us on this form is used only for the reasons set out in the form and is not given to anybody else. Sometimes we may supply details about you to someone else, but only if we are allowed by law, or to protect someone or property.

When information is given out, Council will always try to make sure your privacy is protected in line with the *Privacy and Data Protection Act 2014*. You may ask for more information about Council's Privacy Policy by contacting our Information Privacy Officer on 03 5153 9500 or e-mail feedback@egipps.vic.gov.au

East Gippsland Shire Council

273 Main Street (PO Box 1618)
Bairnsdale Vic 3875
Website www.eastgippsland.vic.gov.au

ABN: 81 957 967 765

13. It is recommended that any primary or secondary treatment system and its associated land application system are installed down slope of an in-ground water tank.
14. Means a school, council, community or other children's grassed playground managed by an organisation which may contain play equipment (but does not mean a sports field)
15. Sub-surface irrigation only.
16. Where an intermittent stream on a topographic or orthographic map is found through ground-ruthing to be a drainage line (drainage depression) with no defined banks and the bed is not incised, the setback distance is 40 m (SCA 2010). The topography of the drainage line must be visually inspected and photographed during the LCA site inspection and reported upon in writing and photographs in the LCA report.
17. The highest seasonal watertable occurs when the watertable has risen up through the soil profile and is closest to the ground surface. This usually occurs in the wettest months of the year.
18. The setback distance to a groundwater bore in Category 1 and 2a soils can be **reduced** to 20m where treated and disinfected greywater or sewage (20/30/10 or better standard) is applied and the property owner has a service contract with a suitable qualified technician to regularly maintain the treatment system.

Final Permit to Use a Septic Tank System

A permit to use the septic tank system will be **issued** after a final inspection from Council's Environmental Health Officer has been approved and a Certificate of Compliance has been given. An "as installed" plan of the **completed** system is also to be given by the plumber, showing all parts of the septic tank system and distances from the house.

The maintenance conditions on the permit will need to be followed for as long as the system is being used.

A 'Permit to Use a septic tank system' must be issued before the septic tank system is used, and this permit is also needed before an 'Occupancy Permit' is issued under the *Building Act 2006*.
