

Fast Jet Performance

SHADOWLANDS

ONLINE FLYING TRAINING

New Joiner Information

Thank you for enquiring about joining the school.

You'll find it a warm and accommodating environment where you can learn at your own pace and fly with other students who all join with varying levels of ability.

This is the link to join www.patreon.com/timdavies

There are two options:

Join as EXPERIENTIA, which gives you access to our professionally designed school based at Nellis AFB in Nevada, featuring 59 detailed and fully documented ranges and target sets, and our detached base based in the Caucasus region of Georgia. These are hosted on two high-speed servers based on the West Coast of the US with very low latency, so you can fly with people anywhere in the world!

“ *‘An amazing and unique insight into Royal Air Force fast jet flying!’ - Jim* ”

You'll also gain access to a large community of students dedicated to enhancing their flying experience. This community can assist you in resolving any issues you may encounter and provide guidance on selecting and setting up equipment for the optimal experience. Additionally, you'll receive invitations to our weekly Friday Night Party session and Sunday session, during which we discuss aviation-related content.

Alternatively, join as DISCIPULUS, which includes all of the aforementioned benefits, along with six formal two-hour lessons every week. While most participants attend just one or two, you have the option to take all six. These lessons are structured following the Royal Air Force's Phase IV Fast Jet Flying Training course.

I previously served as the Senior Instructor at RAF Valley, where I taught both Advanced Flying Training (AFT) on Hawk T1 and Tactical Weapons (TW) training on Hawk T2. The DISCIPULUS tier encompasses both syllabi, divided into two phases: PRIMO (AFT) and EXTREMUS (TW).

You can start PRIMO at any time, and when you feel competent enough, you can start the EXTREMUS phase. Each phase lasts for about 15 weeks, but don't worry, we take regular breaks, and you can always catch up if you miss a lesson!

Further information on both is here
<https://www.fastjetperformance.com> Find the level
that interests you and click 'Learn More' - it will show
you the Syllabi and notional weekly programme.

<https://www.fastjetperformance.com/syllabus>

You will need to download and install [DCS Open Beta 2.9](#) (which is free), and all aircraft and terrains are often on sale for half price. Most students use a hard drive install, but the odd one or two will use Steam; both are fine.

Now you'll need to install [Discord](#), which contains the school.

This is the link to join www.patreon.com/timdavies

When you join, at the base of the joining email, (check the spam folder), there will be a Discord link to click, and hey presto, you'll be in the school!

“

'So it is now one year since I upgraded to Advanced Shadowlands. Do not regret it one bit. Learn more about flying then you could ever need, learn more about yourself then you ever could. This summer watching the Red Arrows display, for the first time ever I did not feel envious and just had a deep appreciation for what it took to get them there.' - rMax

”

Join the School!

www.patreon.com/timdavies

Now, as long as you have some flight controls (I can recommend some), you can fly on the School servers.

However, make sure you read the #readme Discord channel first; otherwise, you won't be able to find them since they are private to keep non-School pilots out.

Don't worry if you aren't very good - I've trained people who have never used a flight sim before. That's the whole point - it's a School!

I'm very much looking forward to you joining, and if you have any doubts, check the next page for some reviews from my students!

See you soon, and remember that this is the link to join:

TIM DAVIES

“

“I came here after struggling with the pace and intensity of the learning curve in the online squad I was with. Immediately, I felt that this was the place I needed to be for learning and flying for fun. The people here are great, and you can learn and fly at your own pace. The lessons are well-paced, and there is a revolving schedule that allows you to catch up and review the material easily. Tim's experience and depth of knowledge are priceless, and he makes the whole experience fun and stress-free. I can't recommend it highly enough!”

- Mark

“Shadowlands is a place off-grid where time is hacked and counted in bananas. Lessons are frequent and to the point. It's the place for aviation beginners, veterans, and enthusiasts alike. In Shadowlands, you will find a fantastic group of unique people, all with a common denominator: the will to improve in flying, whether for real or in simulation. After completing the syllabus, you will have changed the way you approach flying and planning. It increases mental capacity, boosting your day-to-day interactions on and off work. Highly recommended program. Stick with it, and you will be rewarded.”

- Ducksen

"I've always wanted to be a pilot, but things don't always work out. However, this is as close as you can get. In VR, it is amazing. Piloting the most advanced jets in the world with the incredible tuition of Tim Davies, from bombing runs to formation and aircraft carrier landings, it covers it all. Many of the other great guys on Shadowlands are only too happy to help. Join the crew and have some fun!”

- Neil"
