

GUARANTEED AIR SEALING MADE EASY

- **Guaranteed** – always meet your desired ACH50
- **Easier** – little effort needed to find and seal leaks
- **Automated** – little to no manual air sealing
- **Faster** – shorter build times
- **Simplified** – one subcontractor responsible
- **More Effective** – seals even leaks you can't see
- **Lower Cost** – save on labor and materials

"We were seeking a tighter building envelope and AeroBarrier answered the call. The technology is easily deployable in the field, delivers results immediately which is invaluable, and works well in a fast paced production environment."

Mandalay Homes

HOW AEROBARRIER WORKS

- Like a pressurized building, air inside a balloon is at higher pressure than outside
- If there are leaks in the balloon the air inside will find the leaks & escape outside
- AeroBarrier's atomized sealant uses the same principal – it follows the pressurized air escaping the building and seals the leaks

Simple 4 Step Process

STEP 1 Prep & Setup

- Cover finished horizontal surfaces
- Cover openings not to be sealed
- Set up equipment

STEP 3 Monitor & Finish Sealing

- Monitor air sealing progress
- Progress is reported every 60 seconds
- Verify ACH50 achieved

STEP 2 Pressurize & Begin Sealing

- Pressurize the space
- Input your target ACH50
- Begin computer controlled sealing

STEP 4 Certify Seal Completion & Cleanup

- Software generates Certificate of Completion
- Remove protective coverings and equipment
- Construction work can resume within 30 minutes

"AeroBarrier provides a more cost-effective, less fussy, and much faster way to hit air tightness targets."
