

## Homeopathy: A Remedy For All

**M**ind Heal Homeopathy is a system of homeopathy that harnesses the power of the mind and body. It effects deep healing by working at the genetic level to cure chronic and serious disorders. Mind Heal is one of the classic homeopathy at its most powerful. Most people tackle disease including stubborn infections, weight gain and polycystic ovarian disease with antibiotics, painkillers, enzyme inhibitors, hormonal therapy and even surgery. These remedies act at the very root of these destructive processes.

The face is the mirror of the mind because the secret to looking good lies in you're constitutional make-up. When constitutional imbalances are chronic, your hair looks dull or begins to split, your nails turn brittle and your skin breaks out. Cosmetic products either mask these problems or use strong chemicals to force

your natural attributes to look a certain way. MindHeal brings about a deep healing and every one of our patients returns visibly transformed - not only do your ailments clear up but you acquire a glow. Since these remedies work at the mind-

body level, they alter your basic thought processes and gift you a positive outlook to life. We can't choose our life's circumstances - failures, disappointments, unhappy relationships or a demanding job - but we can change the way we perceive and react to them. By rebalancing your basic biochemistry,

MindHeal can bring about a inner transformation. MindHeal Homeopathy is a multi-speciality homeopathic clinic Founded by Dr Anita Salunkhe. Contact: 022-25230530/ + 91-9930363981.
