

Host a Litter Free Event

Mitigate litter, resolve issues quickly and maintain a healthy environment!

Tips below!

You might not smoke, but make sure to provide cigarette disposals for those that do.

Place signs on all picnic tables to remind people to discard their trash once they are finished.

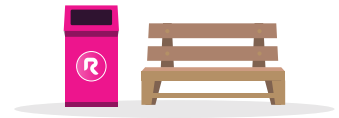

Set up a reporting system (like Rubbish!) for faster issue resolution.

Designate a cardboard drop off area. Request that all boxes are broken down for easier disposal.

Place **extra trash bins near fast-food restaurants** and meeting places to prevent trash on the ground.

Leave an extra set of bins in front of **highly trafficked areas**, like benches or picnic tables.

On the last day, move extra trash bins to the exit of exhibit halls, especially to high-trafficked entryways.

Make your sustainability goals known to attendees and exhibitors ahead of time.
If conference organizers pledge to improve their local impact and leave no trace, their attendees and exhibitors will follow!

Create a digital awareness campaign throughout the duration of the event to remind attendees to be mindful of their litter.
