JOIN THE PHILANTHROPY CHALLENGE TODAY!

10 weeks of student philanthropy to earn money for NGOs and NPOs both animal & human.
While giving our students an unforgettable experience in the value of money, work ethics, civics and citizenship.

"What's impressed me most about The Philanthropy Challenge is that it's not just educating students about the challenges of social inequality, poverty and animal conservation, it's encouraging them to experience something that will stay with them forever... As a former HSC Geography student I'm inspired that you're all taking up the fight against these issues and I encourage every student to get involved. There truly is strength in numbers."
