CHALLIANCE Registration form

In junior geography, students study global environments (eg: rainforests, deserts, savannas), global change (eg: inequality, NGOs) and global issues (eg: threatened habitats, land degradation, overuse of ocean resources, urbanisation).

Teachers educate students as to the various responses that can be made by individuals, groups and governments to 'make a difference' in our global village. Schools then use 'The Philanthropy Challenge' to bring to life the content in order to engage students, teachers, parents and the wider community in philanthropy.

First name:	Last name:
