BACTERIA CONTROL SOLUTION

Transform your hand wash basin in a powerful disinfectant mouth wash

EXCEPTIONAL DENTAL ADVANTAGES

Instead of patients rinsing their mouths with plain water they can now eliminate bacterial infection with **Ozone Infused Water**.

Ozinated water can penetrate the walls of tiny dental tubules, killing harmful bacteria that have taken up residence in these hard to reach places.

Use Ozone Infused water in your practice as a mouth rinse during procedures such as biofilm purging, periodontal pocket disinfection and much more.

Ozinated water has powerful antibacterial and anti-inflammatory properties due to the presence of free radicals which inactivate gingivitis and periodontitis.

DENTAL MOUTHWASH

EXCELLENT HAND WASH ADVANTAGES

Add the benefit of powerful infection control to your hand wash basin

TRI-X3 OZONE HAND WASH STATION

Your best protection against COVID-19 and transmissible pathogens.

TRI-X3, installed in less than 10 minutes, transforms tap water into the most powerful and safe broad-spectrum microbiological control agent available.

An Ozone Infused Water hand wash eliminates cross-contamination from viruses, bacteria and all pathogens in seconds. Significant log 5 reduction of 99.999%

OSHA Compliant safety assurance
