

Gustavo Nascimento

iOS Developer | based in Belgium | www.gustavonascimento.com

I've developed apps featured by Apple, and SDKs used by companies such as Uber and Samsung. My code runs on millions of devices every day.

Experience

Tricount (Freelance)

iOS Developer | Swift | 2019 – Present

App featured on the App Store & in international press

- Worked as the only iOS developer for app with 1M+ of monthly users
- Composed the architecture with different modules: persistence, network, adapters, etc.
- Seamlessly replaced the entire network layer to communicate with a new backend while minimizing impact on users.
- Integrated credit-card payments and ads, increasing monthly revenue by over 900%
- Created new screens with RxSwift and MVVM.

More freelance projects

iOS Developer | Swift | 2018 – 2019

The Voice, Tomorrowland, Brussels Airport, etc.

- Engineered a modular advertising SDK compatible with iOS and React Native platforms, enhancing integration capabilities.
- Implemented ad mediation strategies within the SDK, significantly boosting revenue streams.
- Completed assignment 2 weeks ahead of schedule.

Sentiance

iOS Developer & Squad leader | Objective-C | 2016 – 2018

SDK used by Uber & Samsung.

- Promoted to Squad Lead and scaled mobile team to 5 people.
- Refactored the whole SDK while maintaining the old code base
- Increased test coverage by 50%
- Achieved precise location tracking (with users consent) in the background
- Optimized battery consumption to approximately 5% for continuous daily usage.

Immoweb

iOS Developer | Swift | 2015 – 2016

Belgium's leading real estate platform

- Increased test coverage by 15%
- Reduced crash rates to less than 0.4%

Gengo

Backend Developer Intern | Python & Go | 2014

- Implemented new features with Python and Pyramid
- Implemented new API endpoints with Go
- Created a Swift client during my free time

My apps

Strongify – Workout tracker app

iOS Developer | SwiftUI

[Landing page](#) | [App Store](#)

- Single-handily developed & designed from scratch
- Ran marketing campaigns generating 30,000+ downloads after a couple of days
- Implemented widgets and Apple Watch support
- Applied ASO strategies to improve app visibility and ranking on the App Store.

Serica – Chinese flashcard app

Mobile Developer | Flutter

[Landing page](#) | [App Store](#) | [Google Play Store](#)

- Single-handily developed from scratch
- Implemented custom spaced repetition algorithm
- Created an SQLite database holding 100,000+ Chinese definitions

Education

ULB (Brussels) – 2014 | ICU (Tokyo) – 2012

Master's Degree in Computer Science, graduated with Great Honor

Skills

Swift	Core Location
SwiftUI	Core Motion
Objective-C	AdMob
Flutter	Xcode Instruments
Go	SQLite
Python	Viper/MVC/MVVM
Auto Layout	Core Data
