

Return to regular care and start recovering revenue

3-in-1 Screening Solution

Visitor Screening:

- + Visitor or facility can initiate screening with **AI-powered SMS** or web-based virtual assistant
- + Collects visitor details
- + Validates visitor and confirms time and date of scheduled arrival
- + Sends instant **yes/no clearance status** to visitor with next steps
- + Alerts facility regarding status

Patient Screening:

- + Patient or facility can initiate screening with **AI-powered SMS** or web-based virtual assistant
- + Collects identifying patient details and validates original appointment/procedure
- + Sends instant **yes/no clearance status** to patient with next steps
- + Alerts facility regarding status

Employee Screening:

- + Staff will automatically receive request to initiate screening with **AI-powered SMS** based on shift schedule (min. 2 hours before)
- + Collects employee ID for purposes of tracking
- + Alerts employee and facility in case of failed clearance status with actionable next steps

Compliance:

Break through COVID-19 barriers with virtual screening solutions

Catalyze a return to regular care and take charge of revenue recovery.

Rapidly roll out an easy and scalable screening system to reach large volumes of visitors, patients and employees—providing all parties with the safety and security necessary to get back to business.

Benefits

- + **Increase patient intake and revenues** by safely returning to a cost-effective capacity
- + **Mitigate risk** for patients, visitors and staff by accurately flagging at-risk cases
- + **Automate** the end-to-end process of screenings and use Hyro's Live Agent Handoff for those that fail
- + HIPAA, CDC and SOC-2 TYPE-2 Compliance ensures up-to-date **safety, encryption and security**
- + **Customizable** based on client preferences, like screening and escalation protocols, phrasing, channels and APIs
- + Plug & play solution allows for **frictionless implementation** and no stress on IT teams
- + Hyro's Insights Dashboard captures **results in real-time** and manages web-based and SMS communication
- + Route users to **actionable next steps** such as rescheduling or testing, keeping all parties safe and satisfied

Start screening and begin anew.
