

**PRECIMETER**

Molten metal level control

## **ProV** – Laser Camera Sensor

# ProV – Laser Camera Sensor

**The Laser Camera Sensor model ProV** from Precimeter combines high performance laser triangulation with the necessary control functions to maintain an accurate molten metal level measurement. The patented digital camera technology in the

Precimeter sensors results in very high performance and resolution. The advanced technology enables stable readings even when the molten metal material reflectivity changes dramatically and/or in harsh conditions with heavy steam and smoke environment.
