

Jean

A flower I named after grandma. I noticed it in the woods when I was singing one of grandma's songs. I took it home, even though you're not supposed to replant wild flowers. I told the flower all of my stories about grandma. It wishes it could of met her. Jean says I can talk to her like she's grandma, if I ever get scared.

Jean

Secret Garden

Lex hurt Nimsesku again.

Mom and Dad were fighting. I felt sad so I talked to Jean. Jean said I could make the closet under the stairs my secret space. She said I could have a garden there if I wanted. I will draw plants on the walls until I can get real plants.

Anomaly

The Anomaly is not a flower, but Jean says it is the thing where all flowers come from. I don't understand that, but Jean says that's okay. She said to think one cool thing about the Anomaly, and to use that to understand the rest of it. That's something grandma would of said, so I think of the Anomaly when I sing to my other plants.

Nimseskus

?

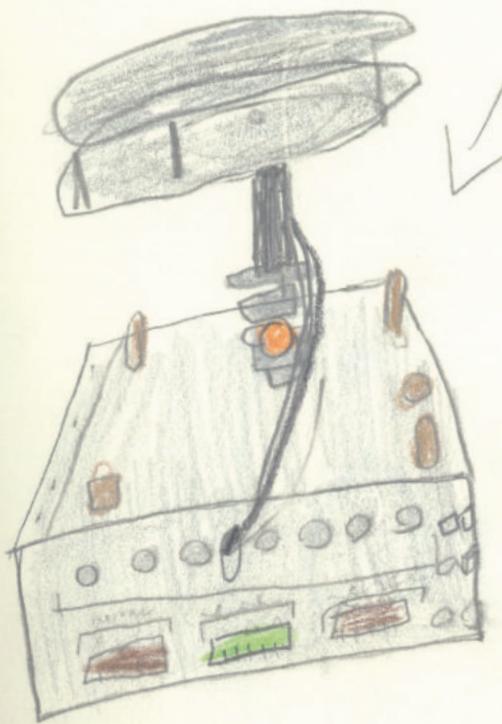

?

Jean says the Anomaly makes many things. It makes so many things that other universes are needed to hold them all. Sometimes it copies the things it makes. Sometimes, Jean said those copies are pulled into different universes. Who's hamster is this? Did we steal it from another kid?

Transducer

I heard a very
loud noise after
Lex went away.
It woke me up
but it didn't wake
mom and dad. I
asked Jean about
the noise. She said
Mom is so sad
about Lex that
she might try
using my grandad's
transducer to
bring him back.
Jean said the
transducer is
dangerous and
it does not do
what my parents
think it does. I
tried to warn mom,
but she is so
sad she will not
listen to me. I
will wait in the
secret garden
until the noise
stops.
