

TAB

The safe, smart, and agile take me anywhere navigation tablet

As an ECDIS producer and a technology partner with over 29,000 licences in use globally, we continue to get asked questions with regards to the availability of a 3rd ECDIS solution which can be used in the event of simultaneous primary and secondary ECDIS failure.

We already provide a solution to market with our ECS solution and are now happy to release SEALL TAB as a further alternative.

Providing situational awareness with official ENC in your hand.

SEALL Tab is the newest software solution from SEALL, it is compact safe, smart and agile and is the perfect solution that will:

- Interface with live vessel position via AIS pilot plug
- Provide instant visibility of your vessel alongside official ENC from anywhere on the vessel
- Tenders to all sizes of passenger groups

SEALL is a technology company which pushes innovation to provide smart user friendly effective technology to improve safety, environment and compliance within the marine sector.

Now powering over
29,000
licensed products globally.

We offer you our professional services to integrate or help with the integration of our Kernel with your solution.

Find out more by visiting seallecdis.com

SEALL TAB is a turn-key solution that has been developed by the team at SEALL so that it can be brought to you as a completed ENC product.

We have created a system built end-to-end for our customers that can be easily implemented, is user friendly and most importantly is safe, smart, and agile, whilst being compact and manageable for modern offshore working.

KEY FEATURES:

- **Portable**
SEALL TAB enables you to ensure you are in touch with the passage wherever it is located on a vessel.
- **Visibility**
SEALL TAB can ensure that when emergencies occur you have greater efficiency and visibility wherever you are on the vessel.
- **Paper Free**
SEALL TAB will save time, money and storage
