Artist statement:

"Speak the truth to power within your own family and out in the world.

History is a continuous story that reveals the truth about its creators.

*My creativity has always been about making objects so as to find,
in their shadows, a truthful image of myself.*

With this work I support those who are speaking their truth and changing history.

Black Lives Matter."

At FUMI we pride ourselves in working with people who aren't afraid to say what they mean and to be who they truly are. The Black Lives Matter movement has forced the world to wake up to the issue.

We are committed to being a long term part of this change and want to start by hosting this auction where 100% of the proceeds will go towards two organisations: [Grassroots Law Project](#) and [Black Lives Matter](#). These two organisations advocate for the deep structural change that is needed not just in the US but around the world. The winning bidder can choose to either keep or donate the artwork to a public space or institution.

We want different to be treated as equal, celebrated, accepted.

With Love, the Gallery FUMI Team xxx
