

Mutts Gone Nuts

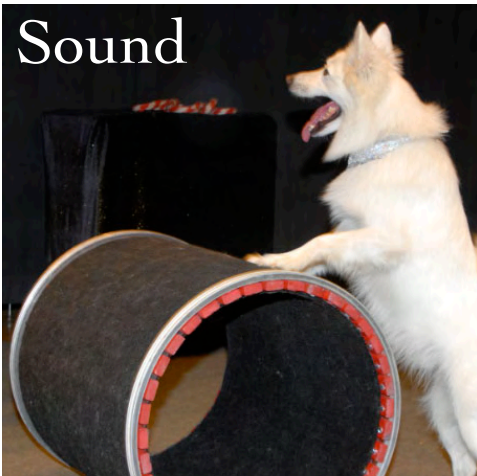

PERFORMANCE & TECHNICAL REQUIREMENTS

Staging

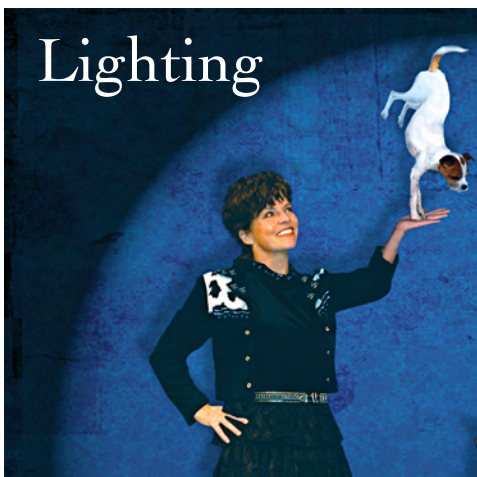

- Minimum stage size should be 24' wide by 16' deep.
- We will need stairs to allow access to the audience.
- Carpet (we provide) will need to be taped to stage floor.
- Slackrope rig will need to attach to any permanent fixture such as a flyrail, bolted solid handrail, column, etc.
- Please provide two gallons of bottled water for the dogs (we will provide bowls)
- Please keep stage free and any cords, monitors, flags or other visual obstructions. *We will not need any monitors.*

Sound

- Sound check to take place 3 hours before the show
- Direct Input-Box (in wing) to patch our mixer into the house system. We can send entire mix through one line or separate three mics and one mp3 line.
- Artists will provide:
- Shure UHF-R (H4) wireless mics (2 headsets & 1 handheld)
- Mackie 1402-VLZ Pro Mixer to be placed in wing
- All music cues will be run by artists from stage.

Lighting

- House lights will need to come up for volunteer segments
- Row of 4 to 6 specials to be 20' from front of stage to illuminate the dog's benches
- General stage wash with warm tones

Additional Information

- Artists will load in 4 hours before the show
- Parking at loading dock for 38' Motorhome
- Loadout will take place after merchandise sales (if applicable) and will take 45 minutes.
