AUDIT FINDINGS

Narrative:

The auditor's description of the audit methodology should include a detailed description of the following processes during the pre-audit, on-site audit, and post-audit phases: documents and files reviewed, discussions and types of interviews conducted, number of days spent on-site, observations made during the site-review, and a detailed description of any follow-up work conducted during the post-audit phase. The narrative should describe the techniques the auditor used to sample documentation and select interviewees, and the auditor's process for the site review.

This was my second time auditing Blue Ridge, although they had new management and had moved locations. I worked with Vision Quest to audit three facilities in their first audits, and had helped them become PREA compliant. During the pre-audit, I met with the PREA Coordinator and Compliance Manager a few times to clarify the process. We also decided to use the online audit system, which was new for both of us.

I spent one day on site--reviewing paperwork, video footage, touring the facility and interviewing residents and staff. I chose to interview all present staff and a few staff on the phone to ensure I met the standard of 10 randomly selected staff as well as specialized staff. Each resident was offered a chance to talk to me and all 9 agreed to be interviewed.

I found the staff to be very well aware of the standards, even if their role wasn't as a specialized staff. Also, many of the staff had been working at Blue Ridge for many years, which is rare to see. Staff prioritized resident safety beyond PREA policies, and it was clear they knew their residents well.

The residents at Blue Ridge were lovely to talk with. They confirmed receipt of the PREA information and screening upon arrival at the facility, and expressed feelings of safety.

AUDIT FINDINGS

Facility Characteristics:

The auditor's description of the audited facility should include details about the facility type, demographics and size of the inmate or resident population, numbers and type of staff positions, configuration and layout of the facility, numbers of housing units, description of housing units including any special housing units, a description of programs and services, including food service and recreation. The auditor should describe how these details are relevant to PREA implementation and compliance.

The facility is a non secure facility for juvenile boys. They currently house 9 residents. Blue Ridge moved to a new building about a year ago, and have made it PREA compliant. There are rooms for recreation and school, and a large cafeteria for meals. Staff have secure offices. There are many cameras in Blue Ridge (all PREA compliant) to ensure safety and security. There are two youth wings next to each other and residents all have their own rooms. The use of the bathroom/shower is in the residence one at a time.

School and therapy services are offered on-site. There is an outdoor space for residents and the location is very remote and rural.

AUDIT FINDINGS

Summary of Audit Findings:

The OAS will automatically calculate the number of standards exceeded, number of standards met, and the number of standards not met based on the auditor's compliance determinations. If relevant, the auditor should provide the list of standards exceeded and/or the list of standards not met (e.g. Standards Exceeded: 115.xx, 115.xx..., Standards Not Met: 115.yy, 115.yy). Auditor Note: In general, no standards should be found to be "Not Applicable" or "NA." A compliance determination must be made for each standard. In rare instances where an auditor determines that a standard is not applicable, the auditor should select "Meets Standard" and include a comprehensive discussion as to why the standard is not applicable to the facility being audited.

Number of standards exceeded:	0
Number of standards met:	43
Number of standards not met:	0
Meets all the standards.
