

Coronavirus Update – May 21, 2020

The health and well-being of our Residents and team members continues to be our top priority. As previously shared, Fleet Landing made the leadership decision to begin proactively testing asymptomatic team members in Derfer Pavilion in late April, through a partnership with a local hospital. Through those testing efforts, we identified one positive result for a team member. The team member has been self-isolating, has no signs and symptoms of the illness, does not work in a direct care role, and had been wearing the appropriate Personal Protective Equipment (PPE) prior to testing positive for the coronavirus.

The Department of Health visited Fleet Landing May 1st and supported our efforts by testing additional team members and all Residents residing in our Health Services neighborhoods. Today, the Department of Health verbally relayed the specific results from the tests that they administered. The results included one positive, asymptomatic Resident in Derfer Pavilion from a test administered when they began testing on May 1st. The Resident has not and is currently not showing signs and symptoms of the coronavirus. All other Resident and team member results that the Department of Health shared, as well as those tests administered by Fleet Landing, have come back negative. Fortunately, there are no Residents or team members showing any signs or symptoms of the coronavirus on our campus.

As a measure of caution, and to maintain our commitment to identify unknown asymptomatic carriers, Fleet Landing continues our strategic testing initiatives. We have initiated additional testing of Residents residing in Derfer Pavilion and team members. We will adapt our testing plans as new methods and research becomes available. We have engaged, on an ongoing basis, our partners at Leading Age Florida for consultation regarding our infection control measures. They continue to assert that the measures Fleet Landing has taken continue to show that we are meeting and exceeding regulatory guidance offered by health agencies.

Fleet Landing has been diligently following all federal and local recommendations over the past two months to maintain the health and safety of our Residents and staff. A series of precautions currently in place include:

- Screening for all team members, vendors, and essential visitors for exposure to COVID-19 and signs or symptoms of the illness, including a temperature check
- Implementing additional sanitizing and disinfecting housekeeping procedures
- Monitoring Resident travel and asking those who have travelled to self-isolate
- Cancelling group exercise, events, and communal dining
- Closing our gym, woodworking shop, and amenity areas where appropriate social distancing is not possible
- Restricting visitors to Fleet Landing
- Providing ongoing education to our Residents and team members regarding handwashing and social distancing, per CDC guidance
- Following CDC guidelines for use of personal protective equipment in all settings

We certainly understand how difficult this news is to hear. We maintain our steadfast commitment to do everything in our power to minimize the impact of the pandemic on our community. Fleet Landing is committed to providing you with updated information regularly. Please email contactus@FleetLanding.com with any questions. For additional information regarding COVID-19, visit the CDC website <http://www.cdc.gov>. Thank you for your continued patience and support of our efforts.
