

S/4HANA Public Cloud Implementation

Global Solar & Energy Storage Company powering the solar revolution with utility scale, commercial and public sector solar and energy storage systems. They deliver excellence in several areas such as solar and energy development, financing, engineering, procurement, construction, operations and maintenance for investors and clean energy consumers across Europe and America.

CHALLENGES

- Legacy financial software limited capabilities to maximize efficiencies
- Limited visibility to the company's complete financial state
- Complex organizational hierarchy
- Accounts payable, accounts receivable and purchasing were accomplished via e-mails and spreadsheets
- Manual approaches to process vendor payments
- Opportunities to improve finance close cycle
- Visibility to project spend
- Difficulties with audits and addressing findings in a systemic way
- Multiple data sources limiting the ability to leverage needed information for decision making

SOLUTIONS

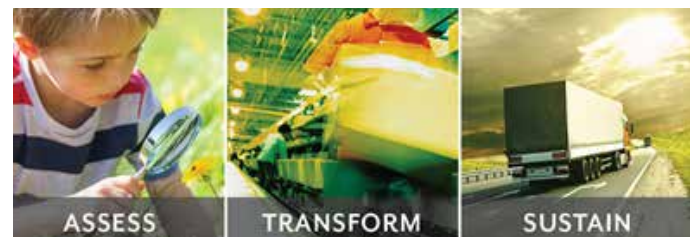

We worked with this team to successfully implement SAP S/4HANA Public Cloud in less than six (6) months. The implementation included Finance (FI), Controlling (CO), Project Systems (PS), Materials Management (MM), and Consolidation (CONS).

Established a complex organizational structure of 40+ companies and new Master Data elements that reflects how the business transacts.

Operational and financial reporting now allows for greater visibility and transparency to what historically occurred and is occurring in real time.

BENEFITS

- Run SAP financials across 40+ companies
- Real-time visibility of financial state for the entire company
- Increased visibility into financials within each company code
- 5-day close – reducing the amount of journal entries
- Increased control over spend on projects and improved visibility to budget status
- Effective use of SAP Analytics to improve decision making
- Decrease audit costs
- One source of truth with trusted data
- All employees in SAP can enter update and view their information
- Ability to add in European entities at a future point
- Educated and motivated employees leveraging SAP best practices
