

Annie Tong

The Everyday of Life is Annie's current project and is intended to act as a counterweight to the endless newsworthy images that bombard us daily, framing the lives of others within the context of global tragedies and extraordinary events. *The Everyday of Life* photography strives instead to be both uneventful and familiar, to explore the beauty of everyday life in places we all too often forget to look, and to celebrate people at ease in their lives even though their lives may not be easy.
