CONNECT YOUR FACTORY TO THE SITE FROM END TO END

The construction industry is shifting towards advanced methods, leveraging end to end digital supply chain integration and project execution. cmExe allows you to reduce total costs and get paid faster by digitizing your project execution worflow, maintaining full visibility of your supply chain, production schedule and completed progress, while simultaneously sharing this data with your stakeholders in real-time via the cloud. With a single company subscription, cmExe allows you the option to invite internal and external users for free to a single project (project subscription) or across multiple projects (enterprise subscription).

FEATURES

- Real-time tracking visualized on shareable 3D viewer in the browser
- 100% cloud based application including offline mode
- Fully customizable production processes and workflow
- Single source of truth for all production tracking
- Customizable user roles and permissions
- Integrated QR code and RFID generation
- Visualize Bill of Materials on a dashboard or filtered view from 3D production model at all times

BENEFITS

- Provide real-time status updates to your client via a web interface
- Go paper-less by digitizing delivery of projects from end to end
- Full traceability on all batches materials linked to parts and assemblies
- Identify process bottlenecks to mitigate risks
- Get paid faster for your work completed
- Reduce reporting and engineering time
- Reduce material waste with integrated 1D, 1.5D, 2D, and 3D nesting
- Supports 2D shop drawing and 3D BIM/CAD workflows
