

Step-By-Step

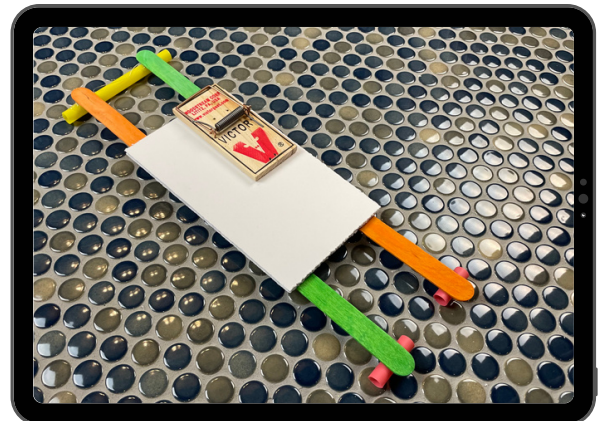

1. Glue popsicle sticks underneath that look like forks

2. Glue straws to bottom of popsicle sticks. And make sure they are lined up with each other

3. Glue on mouse trap, make sure it is aligned like shown in the picture!

4. Trim the edges of straws, and on OPPOSITE side of the mouse trap, trim between popsicle sticks!

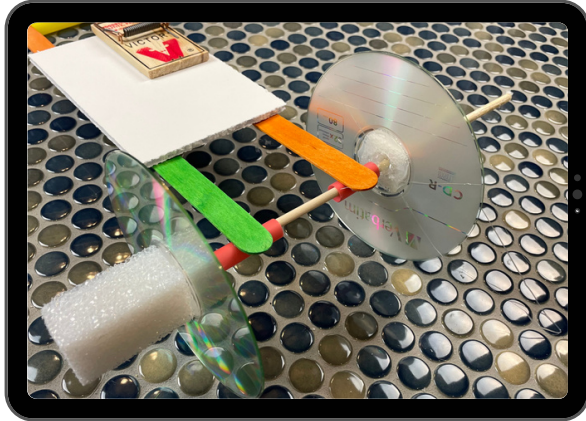

5. Glue foam blocks over middle of CDs

6. Slide wood dowel through foam and glue it in there!

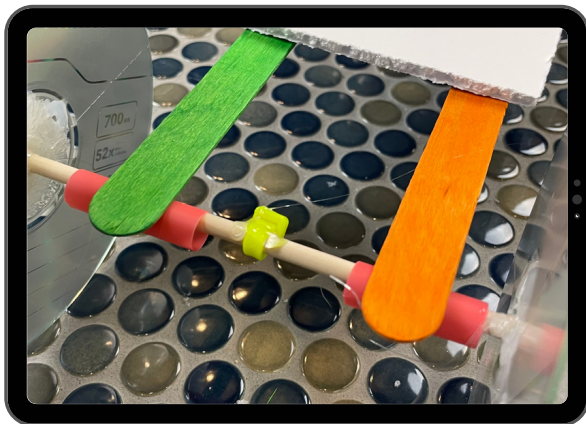

Step-By-Step

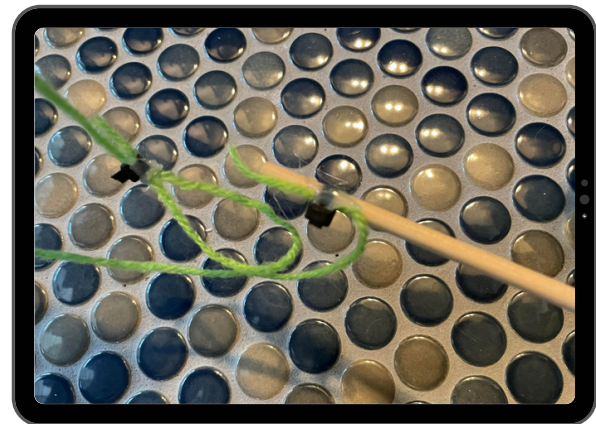

7. Slide dowel through straw, then attach the other wheel the same way!

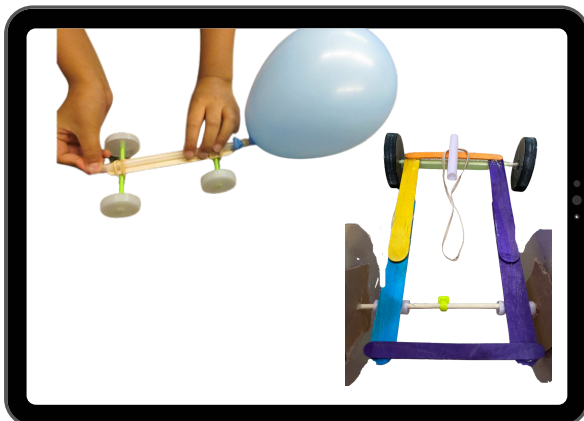

8. Zip tie and then glue a dowel to the middle side of the mousetrap

9. Put a zip tie on middle of dowel on side that has straw cut between popsicle sticks. Then glue it

10. Zip tie and glue string to top of dowel and a loop at the bottom

Example of balloon car option and rubber band powered option!

HELPFUL TIPS!!

- Make sure you copy the direction of the mousetrap on the base!
- Can add hot glue to wheel/stick to ensure bond
- Make sure wheels & straws are aligned with each other
- Get an extra set of hands when zip tying your rod to the mouse trap, and also when winding it up to test for the first time
