KWC FEATURES

- a.

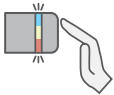

Automatically shuts off LED Shine after 30 minutes.
- b.

Ensures the pull-out is always in the right position and snaps it back into place for your convenience.*
- c.

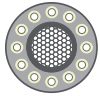

Move the tap in any direction with assurance it will remain stable when not in use.
- d.

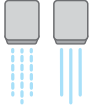

Replacing the conventional tap mixer, it reacts to a gentle tap for the ultimate convenience.
- e.

Produces a clear, solid water stream with minimal splashing.
- f.

Not only does LED Shine show the tiniest speck of dirt, it also makes a statement and lights up your workspace.
- g.

From a standard spray to needle spray, easily control the flow of water from the spray head with a touch of a button.
- h.

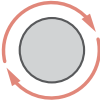

Ideal for filling pots and washing salads, it provides greater flexibility around the sink.
- i.

Removes limescale build-up while water is running, meaning cleaner water for you and your family.
- j.

Keeps the water flow exactly how you like it with a continuous flow.
- k.

Allows you to easily move your tap around the sink, extending your working area. Rotation is available from 120° to 360°.
- l.

Features double skin technology to minimise burning. It allows the tap to become warm but not hot.
- m.

Minimises knotting or twisting in the pull-out hose.*

*Available with pull-out models only

Precise.
Pure.
Elegant.

WHY KWC?

Globally recognised as one of the finest tap makers, KWC achieves excellence through the constant pursuit of perfection in every step of the journey. Boasting functionality, innovation and design, KWC strives to enhance your kitchen with exclusive and premium product ranges.

Precise

We respond to our customers high expectations with precise solutions that encapsulates 140 years of experience in working with water. This promise applies both to the proven quality of our production processes and our commitment to Switzerland as a production location. It is also reflected in our well-established cooperation with employees, partners and customers in our reliable attention to detail and strong service philosophy.

Pure

KWC taps offer our customers extra value when it comes to comfort, care and investment security. Our solutions are developed in Switzerland and aim to fulfil the highest technological standards with intuitive and resource-friendly functions. This is because we share a long-term responsibility with our customers to use water, earth's key resource, in a respectful way.

Elegant

The design elements of KWC's taps symbolise the Swiss Alps and its pure refreshing water. Our designs have won awards from international expert juries for their unique aesthetics and user-friendly ergonomics, while the aesthetic appearance of our taps ensures our customers' trust in the KWC brand.

In 1957, the first pull-out was invented by KWC.

Pure brass is used to make the fittings.

In 1978, KWC developed the first low-pressure die casting machine in the world.

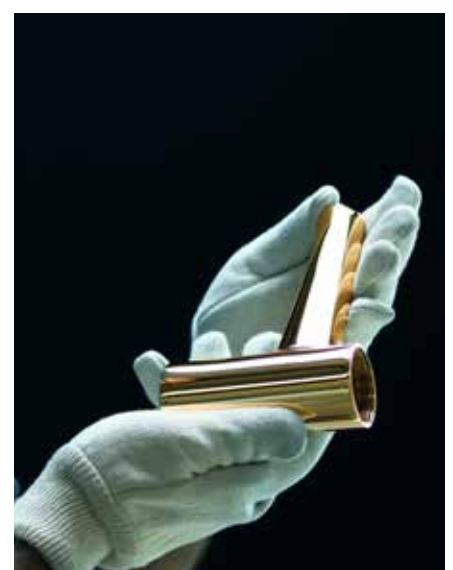

Using low pressure die casting, the brass is melted and then poured into sand moulds.

Blanks for fittings.

Shape of the fitting in brass.

Each part is machined to meet the highest standards.

KWC FEATURES

Auto LED Shut Off

Automatically shuts off LED Shine after 30 minutes.

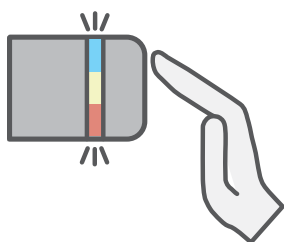

Easy Lock*

Easy Lock is equipped with special positioning pins that ensures the pull-out is always in the right position.

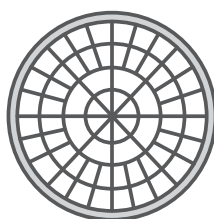

Highflex

High Flex makes it possible to move the spring hose in every direction while ensuring it remains reliably stable when not in use. Exclusive to the Ono range.

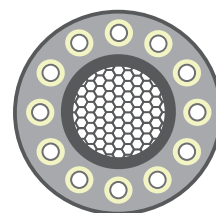

Intelligent Control

Intelligent Control reacts to a tap of your finger and can be programmed based on your personal habits and requirements. A light ring that indicates the current water temperature. Exclusive to the Zoe TLP range.

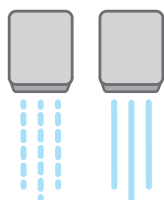

Laminar Aerator

Bring the beauty of laminar flow into your kitchen. Replacing the conventional mesh aerator, it produces a clear solid water stream with minimal splashing. Exclusive to the Era range.

LED Shine

LED Shine does more than just contribute to a special working atmosphere. This innovative feature makes it easier to see the tiniest speck of dirt and makes it possible to use the tap without turning on a light.

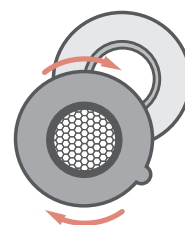

Power Clean

The spray you want at the touch of a button: Power Clean makes it easy to switch the flow of water on the spray head from a standard spray to a fine needle spray.

Pull-Out

A nozzle that pulls out of the tap, giving you greater flexibility to move around the sink.

Spray Clean

Actively helps with the removal of limescale build up. Any deposits are sprayed away when the water is running. A special fastening mechanism helps with more stubborn lime deposits.

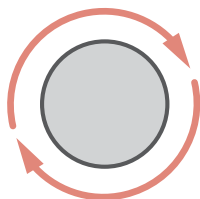

Spray Lock

With Spray Lock, you can keep the jet of water from your tap flowing exactly how you want, even when the water is shut off. When you turn the water back on, the water flows in the same way again. Exclusive to the Inox range.

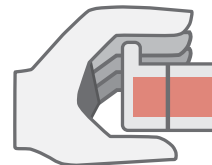

Twist Protect[®]

Twist Protect prevents the pull-out hose from twisting or knotting.

Swivel Spout

Ranging from 120° to 360°, a swivel spout allows you to direct the water flow anywhere in the sink without a pull-out.

Touch Protect

Intelligently minimises scalding. An insulated hot water guidance system with a “double skin” principle means the body of the tap or the pull-out can become warm but never hot.
