

Autumn Blaze® Maple Tree

Growth Rate Fast Mature Height 50' Mature Spread 40'

Zone 3 Temps (C) -40 to -34.4° Temps (F) -40 to -30°

The Autumn Blaze Maple is fast growing oval shaped tree that is resistance to drought and cold weather. This tree is probably one of the most well known Red Maple trees. One caution about this tree is its need for lower water pH. When this tree is watered with high pH levels, leaves will turn yellow in the summer months. If your irrigation water has high pH, we recommend the Redpointe Maple as a great alternative. Fast growth rate.

Fall Color- Orange-Red
