STELLAR WINERY
ORGANIC WINE CELLAR

Western Cape, South Africa

Stellar Organics No Sulfur Added Shiraz

IDEA *Stellar Organics was developed to be an everyday-drinking wine for the educated consumer who is looking to enjoy wine that is produced without the addition of sulfur dioxide (sulfites) at any stage of the winemaking process. The end result is a range of No Added Sulfur wines*

VINEYARDS *The grapes used to make this delicious wine is grown in the Olifantsriver region, stretching between the towns of Trawal and Koekenaap. The semi-arid climate makes this region ideal for organic viticulture, where the grapes are irrigated using an aqueduct.*

TASTING NOTES *This Shiraz has a rich, dark color with a nose of floral spice and pepper. The black olive and dark cherry flavors on the palate gives this wine an all-round juiciness*

BEHIND THE CELLAR DOOR *To produce this wine, grapes are harvested at optimal ripeness and at night to preserve the freshness and fruitiness of the flavours. Fermentation takes place in stainless steel tanks for two weeks, whereafter all pump-overs are carried out by inert gas and gravity.*

PAIRING *Pair a glass of this wine with tandoori lamb chops, grilled baby back pork ribs or roast duck in a plum sauce.*

CELLARING *Drink up!*
