

Multi-Store Management for Pharmacy

Unify Your Operations & Improve Your Performance With Maplewave's Pharmacy Software

Managing multiple pharmacies brings many operational challenges around standardization, visibility, efficiency, and performance. Maplewave's robust multi-store POS helps you unify your locations and manage them as a group for superior results.

Benefits

DRIVE PERFORMANCE

View real-time profitability, sales, costs, and inventory information across all your stores in a single place, so it's easy to know which actions will get results.

UNIFY YOUR OPERATIONS

Bring consistency, alignment, and standardization across all your locations so direct comparisons become possible. This includes pricing, discounts, profits, costs, and inventory, and more.

INCREASE OPERATIONAL EFFICIENCY

With all your data in once place, you'll spend less time gathering and analyzing KPIs across multiple stores for incredible efficiency benefits.

UPGRADE YOUR INVENTORY MANAGEMENT

Further reduce excess stock and shortfalls by managing inventory at the global level vs the individual store; built-in suggested orders and transfers distribute inventory across locations.

FEATURES

Reporting

- Provides a complete view of your chain's performance.
- Real-time data is presented in dashboards and reports.
- View data by store, or across all locations.
- Evaluate the success of promotions and events.
- Supports planogram and purchasing decisions.

Inventory Management

- Optimize the allocation of inventory across stores so customers never leave empty handed.
- Easily transfer stock between branches.
- Suggested ordering takes the guess work out of ordering "must have products" at the right time and quantity.
- Identify hot and slow-moving items, and overall inventory trends.
- Compare costs, product codes, discounts, and inventory turns across locations.
- Supports buying and planogram decisions.

POS

- Compare profitability and sales volumes across every store.
- Identify underperforming and high-performing locations.

Loyalty

- Understand how your loyalty program is performing, including earnings and redemptions.
- Provides data that informs future marketing activities and promotions.

AWS Hosting

- Centralized database enables a single view of performance across your company, which is not possible when stores use individual servers.
- Cloud database offers secure storage with continuous backups.

About Maplewave

Since 1989, Maplewave has helped pharmacies overcome their pain points and digitally transform their operations. Built by retailers, for retailers, our pharmacy solutions have been designed to meet the unique needs of the industry. A true partner, Maplewave has the solutions and expertise pharmacy owners need to thrive for years to come.
