

DeviceSHIELD

Actionable Device Intelligence

“ Throughout the proof of concept, DeviceSHIELD’s risk intelligence consistently detected malicious users across multiple accounts and was the only technology that could tell the exact moment a good user had turned bad. ”

Jean-Baptiste Dodane
Product Manager - Fraud, Safety & Identity, BEAT

DeviceSHIELD helps mobile apps build customer trust by detecting every malicious device and user. Using exclusively non-PII data, it flags malicious users at the exact moment they turn bad so businesses can prevent fraud attacks and stop users from exploiting their system.

The DeviceSHIELD Advantage

Build Customer Trust

Create a safer user environment by protecting your consumers without compromising their experience.

Prevent Fraud and Abuse

Detect both fraudsters and opportunists in real time with SHIELD’s AI Engine.

Tailor your Fraud Strategy

Use DeviceSHIELD as a standalone solution or to empower existing anti-fraud systems.

Unparalleled Technology

Expose Malicious Tools In Runtime

Our risk indicators expose every malicious tool and technique, from GPS spoofers and emulators to app cloners and more.

Identify Every Device, Every Time

Detect multiple users on the same device with unmatched accuracy.

Know When Good Users Turn Bad

Supercharge your risk intelligence with SHIELD Sentinel, the only technology that identifies the exact moment a user begins exhibiting malicious behavior.
