

# NEBEL CSI

**LaborChart** helped them  
save 12+ hours each week

## THE PROBLEM

Tony Vielhauer was caught in a vicious cycle. The general foreman for Nebel Construction Services, Inc., was spending half of nearly two days trying to coordinate labor across 10–20 different projects.

Vielhauer wanted to be in the field but was stuck at his desk at the specialty contractor's headquarters in Lenexa, Kansas, coordinating assignments, scheduling labor, writing on a whiteboard and updating an Excel spreadsheet. He was racking up cell phone minutes on countless calls figuring out who was going where.

He needed a change. Nebel CSI needed a change. They needed LaborChart.

## THE SOLUTION

LaborChart helped Nebel CSI move from a manual workforce management system to a cloud-based solution with ongoing support and relevant data integrated from other systems.

Initially, Vielhauer was worried about the amount of personnel data that needed to be uploaded into a digital workforce management platform. His worries quickly disappeared. "I'm not an IT person at all; but it was so simple that anybody can do it," Vielhauer says.

When Vielhauer had questions about the platform, there was always a real person ready to chat and answer questions. "The support team answered all my questions," Vielhauer says. "But this was so easy that I jumped right in."

## COMPANY OVERVIEW

HEADQUARTERS:  
Lenexa, Kansas  
United States

COMPANY SIZE:  
100 employees

COMPANY TYPE:  
Specialty Contractor,  
Walls + Ceilings

Nebel Construction Services, Inc. works with commercial, industrial, medical and recreational clients across the Greater Kansas City area. Nebel CSI provides project management and construction services, with a specialty in interior construction.

## THE RESULTS

Nebel CSI is now exclusively managing labor through LaborChart. The cloud-based workforce management platform has better aligned the field and office while helping Vielhauer claim back his time.

"We still have a whiteboard. My kids play with it when they come visit the office."

- Tony Vielhauer, General Foreman

The new digital platform has streamlined their scheduling process giving their organization confidence that jobs are being staffed up and down with intention. Project managers can see who is on a project, understand numbers at a glance and add details to a daily log.

**12+** | Nebel CSI saves 12+ hours each week using LaborChart

Vielhauer estimates LaborChart saves him 12 to 15 hours per week. He can now be in the field more and has seen a direct impact on his productivity for himself and others.
