Work of the Board

The work of the Board of Directors is governed by a procedural plan that was most recently adopted at the statutory meeting on 28 April 2010. The work of the Board follows a yearly plan containing fixed decision points that is adopted every year in connection with the statutory meeting. According to the procedural plan, the Board is responsible for the company's organisation and management of the company's affairs. Among other things, the Board's procedural plan includes information about the separation of duties between the Board, the Chairman, the CEO and the Board's committees.

The Board continuously monitors the financial situation of the company and the Group so that the Board is able to meet the monitoring obligations required by law, the NASDAQ OMX Nordic Exchange's Rules for Issuers and good board practice. The procedural plan states that it is the responsibility of the Board to decide on matters that are not part of operating activities or that are of major importance, such as material financial commitments and agreements and significant changes in the organisation.

Every year, Bure's Board of Directors establishes and documents the company's goals and strategies and discusses marketing, strategic and budgetary issues. The Board establishes the company's finance policy, right of authorisation and decision-making procedure. The Board has formulated specific instructions regarding the responsibilities and powers of Bure's CEO. The management continuously provides the Board with reports and updates about operations. Information materials and decision data ahead of Board meetings are distributed around one week prior to each Board meeting.

The company's auditors attend two Board meetings every year to report on the year's audit and their evaluation of the company's internal control system. The auditors present their observations from the annual audit directly to the Board. Once a year, the auditors meet with the Board without the presence of any member of the Executive Management.

Work of the Board in 2010

The Board normally holds six meetings during the year, and meets more frequently when required. In the past financial year the Board held 10 meetings, consisting of 7 scheduled meetings and 3 extra meetings, of which 3 were held per capsulam. See Board attendance in the table below.

The total amount of Board fees in Bure Equity AB as approved by the 2010 AGM amount to SEK 1,260,000, of which SEK 500,000 is paid to the Chairman.

Board evaluation

Once a year, the Board carries out a systematic evaluation in which the Board members are given the opportunity to state their views on the working procedures, Board materials, their own performance and that of the other Board members in order to develop the

work of the Board and to provide the nomination committee with a relevant basis for decision ahead of the AGM.

Board committees

The Board's procedural plan contains instructions regarding the compensation committee and audit committee. The work of both the compensation committee and the audit committee is performed by the Board as a whole.

The compensation committee discusses and decides on matters relating to compensation in the form of salary, pensions and bonuses or other terms of employment for the CEO and staff reporting directly to the CEO. Proposed principles for compensation to the CEO and Executive Management will be put before the AGM on 28 April 2010 for decision.

The role of the audit committee is to continuously support the Board in matters relating to auditing, internal control and review of the annual accounts and interim reports. The committee is also responsible for evaluating the auditors' performance and preparing for election of new auditors when appropriate. The entire audit committee met with the company's auditor on two occasions during the year.

Principles for compensation to senior executives

The AGM adopts principles for compensation to senior executives. Proposals are prepared by the compensation committee. The main principle is to offer market-based compensation and terms of employment. The total compensation package consists of fixed basic salary, variable salary, pension benefits and other benefits. The principles that were applied in 2010 are described in the administration report. Information about compensation to the CEO and other senior executives during 2010 is provided in Note 35. The Board intends to propose that Bure's 2011 AGM approve unchanged principles for compensation and other terms of employment for senior executives.

Financial reporting

Bure's financial reporting is based on the applicable laws, regulations, rules, agreements and recommendations for companies listed on the NASDAQ OMX Nordic Exchange. A more detailed description of the accounting policies is provided on pages 41–46 of the annual report. The audit report for the financial year is found on page 62 of the annual report. The Board and the auditors communicate on an ongoing basis. The Board continuously ensures that the company's finance and accounting organisation is properly dimensioned and has adequate resources.

Every year, the Parent Company issues instructions regarding the financial information to be reported by the subsidiaries and other portfolio companies. Among other things, this information includes income statements, balance sheets, cash flow statements and key figures. A more extensive reporting package is required of the subsidiaries in connection with the annual closing of the books. This reporting takes place in a group-wide accounting system with built-in controls to ensure high quality.

In accordance with the requirements stated in the listing agreement with NASDAQ OMX Stockholm, the company provides financial information in the form of interim reports, a year-end report, an annual report and press releases in connection with significant events.

Deviations from the Code

According to section 7.4 of the Code, the Board of Directors is required to evaluate the need for a special audit function (internal audit) on a yearly basis. The Board's assessment is that Bure has no need for this function under the present circumstances. The Board has instructions and continuously ensures that the responsible individuals in the organisation have the requisite expertise and resources to fulfil their duties in the preparation of financial reports.

The Board's description of internal control over financial reporting for the financial year 2010

As stated in the Swedish Companies Act and the Swedish Code of Corporate Governance, the Board of Directors is responsible for the company's internal control. This description has been prepared in accordance with the Swedish Code of Corporate Governance, section 7.4, and is thereby limited to internal control over financial reporting. This description is not part of the formal annual report.

Control environment

The procedural plan for the Board and instructions for the President ensure a clearly defined division of roles and responsibilities that promotes effective management of the company's risks. Furthermore, the Board has established a number of normative documents for internal control, and among other things emphasises the importance of having clear and written instructions and policies that

also apply to the Group's subsidiaries. The Executive Management regularly reports to the Board according to established routines and is responsible for the system of internal controls that is necessary for management of significant risks in day-to-day operations. This includes guidelines that promote an understanding and awareness among the various executives for the importance of their respective roles in maintaining good internal control.

Risk assessment and control activities

In assessing the risk for irregularities in the company's financial reporting, Bure has developed a model in which a number of areas with a heightened risk for errors have been identified. Special attention has been given to the creation of controls to prevent and detect deficiencies in these areas. Areas where material deficiencies are noted are dealt with immediately.

Information and communication

Significant guidelines, manuals, policies, etc., of relevance for financial reporting are continuously updated and communicated to the appropriate employees. There are both formal and information communication paths to the Executive Management and Board for significant information from the employees. For external communication, there are guidelines to ensure that the company lives up to the highest demands regarding complete and accurate information to the market.

Monitoring

The Board continuously monitors and evaluates the information provided by the Executive Management. This includes ensuring that action is taken with respect to any deficiencies or recommendations identified in internal and external audits.

Internal audit

The Board has not found reason to set up an internal audit function. The Board's opinion is that there is no need for this function in the company and that it is not financially justifiable in an organisation as small as Bure's. The Board has instructions and continuously ensures that the responsible individuals in the organisation have the requisite expertise and resources to fulfil their duties in the preparation of financial reports. Bure is always represented on the boards of all holdings. Depending on the holding, it is also possible to appoint more than one member to represent Bure.

Bure's holdings are represented in different industries with a geographic spread. Furthermore, Bure's mission is to acquire and divest its holdings continuously. As a result, it is deemed more appropriate to decide for each individual holding than to set up an internal audit function at the group level. The Parent Company Bure Equity AB with seven employees is relatively small and lacks complex functions where it is difficult to achieve transparency. The need for an internal audit function in the Parent Company must therefore be regarded as small.
