

Declaration on Operation of Tigo Power Maximizers with Samil Power Inverters

This declaration covers the following Samil Power inverter models.

- SolarRiver TL and TL S
- SolarRiver TL D
- SolarLake TL and TL PM
- SolarRiver TL-US and TLA-US

All the above inverter models are compatible with PV modules with integrated Tigo Optimizers as well as Tigo Add-On Maximizers.

The Samil Power design tool will ensure that PV modules integrated with Tigo Optimizers meet Samil Power inverter operating parameters under all working conditions. Use of both Tigo products; integrated Optimizers as well as 'Add On' Maximizers will not affect Samil Power warranty on inverters as long as the operating parameters do not exceed inverter specifications.

This declaration is subject to the following.

1. The maximum operating DC voltage and current of the system do not exceed the limits of the inverter at all times.
2. Samil Power Ltd does not take any responsibility for the performance of the Tigo products.
3. Samil Power Ltd assumes no responsibility for the PV system's compliance with EMC and other local regulations.
