

STATE OF WASHINGTON
Washington State Conservation
Commission
SOLE SOURCE POSTING

March 31, 2023

The Washington State Conservation Commission (SCC), contemplates awarding a sole source contract to Enkon Information Systems, Inc. (Enkon) to provide software subscription services and maintenance support for the Conservation Practice Data System (CPDS) database developed by Enkon.

SCC requires software subscription and maintenance support for a custom cloud-based database software application (CDPS) developed and owned by Enkon. CDPS was initially developed by Enkon for SCC beginning in 2009, with ongoing development and maintenance since that time. Without code ownership, no other vendor can provide subscription services and software support.

SCC will enter into a one (1) year contract with Enkon. The contract will be issued on or after July 1, 2023 and will continue for a one year term. The cost of this one year contract is \$100,000.

Offerors contemplating the above requirements are required to submit capability statements detailing their ability to meet the state's requirements within five (5) working days of this announcement.

Capability statements should address the following state requirements:

- Provide subscription services to the Enkon product for SCC and other users as administered by SCC;
- Provide software maintenance and bug fixes for the Enkon product;
- Provide secure CPDS data storage and backup;
- Maintain and operate a helpdesk for prompt resolution of maintenance tickets and bug fixes; and
- Maintain CPDS system to be compliance with Washington State Office of the Chief Information Officer standard.

In the absence of other qualified sources, it is the state's intent to make a sole source award of the contract. To submit capability statements or for questions, contact:
