

Medical Grade Silicone Penrose Drains

Bentec Medical's sterile Silicone Penrose Drains are designed to promote the removal of blood, lymph and other fluids from surgical wounds via gravity. High quality medical grade silicone provides biocompatibility with a variety of tissue fluids while eliminating the potential for latex-induced allergic reactions. The Bentec Penrose Drain design combines a smooth exterior wall surface that enhances ease of placement within the surgical wound with a ribbed interior wall that aids gravity drainage of tissue fluids.

Available in a variety of sizes and lengths, the Bentec Silicone Penrose Drain supports the key goals of post-operative drainage, namely wound healing, infection prevention and pain reduction.

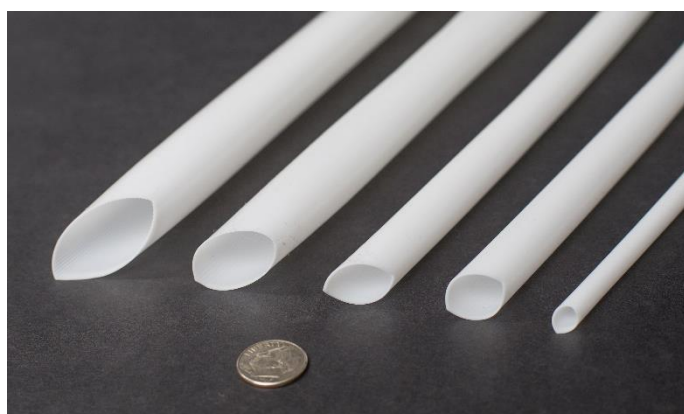

Medical Grade Silicone Penrose Drains

FEATURES

- Smooth exterior surface combined with ribbed inner tubing wall
- Medical grade silicone – soft, flexible, kink resistant design
- Radiopaque design
- Range of diameters and lengths
- Sterile product
- Not made with natural rubber latex

BENEFITS

- Provides ease of insertion & placement
- Aids gravity fluid drainage
- Biocompatibility supports short term placement
- Minimizes potential for adhesion formation externally or obstruction formation inside the drain
- Decreases potential patient discomfort
- Ease of identification on x-ray
- Provides surgeon with options to address different wound drainage requirements
- Reduces potential of infection
- Eliminates potential for latex-induced allergic reactions
