

Keeping open spaces
safe & green with...

CoverLawn as its name suggests, is a cover which is placed over your grass areas. It is easy to install and it protects your natural grass from damage.

Simply roll it out, peg it down, and watch your grass grow from beneath.

CoverLawn is unique. It is an open synthetic turf, with no backing. Via a knitting technique, the synthetic fibres create a braid of knots, and when stretched, these braids form a honeycomb of holes. These holes allow the natural grass to grow through, and the fibres protect the grass from damage.

A true 'hybrid grass' for open spaces. Creating safe, stable natural grass areas.

CoverLawn can be laid over seeded, instant turf, or an existing lawn.

Problem solved!

KEY BENEFITS

- Protects your natural grass
- No more bare patches
- Designed for drainage and roots to grow
- Affordable, easy installation
- 'Best of both worlds' natural grass + synthetic grass

DOG PARKS

- ~ Deters dogs from digging holes in the turf.
- ~ Protects and reinforces the natural grass.

ASSET MANAGEMENT

- ~ Eliminates bare patches in high-traffic areas.
- ~ Maintains a stable, safe surface year-round.

PEDESTRIAN ZONES

- ~ Less closures from heavy foot-traffic.
- ~ Safe and secure footing.
