

You can have a
perfect lawn with...

COVER LAWN™

CoverLawn as its name suggests, is a cover which is placed over your lawn. It is easy to install and it protects your natural grass from damage.

Simply roll it out, peg it down, and watch your grass grow from beneath.

CoverLawn is unique. It is an open synthetic turf, with no backing. Via a knitting technique, the synthetic fibres create a braid of knots, and when stretched, these braids form a honeycomb of holes. These holes allow the natural grass to grow through, and the fibres protect the grass from damage.

This gives you a true 'hybrid grass' for home lawns. No more bare patches.

CoverLawn can be laid over seed, instant turf, or an existing lawn.

WOW!

KEY BENEFITS

- Protects your natural grass.
- No more bare patches.
- Free draining.
- Strong root system.
- Affordable, DIY installation.
- 'Best of both worlds' natural grass and synthetic grass.
- No more holes from pets digging.

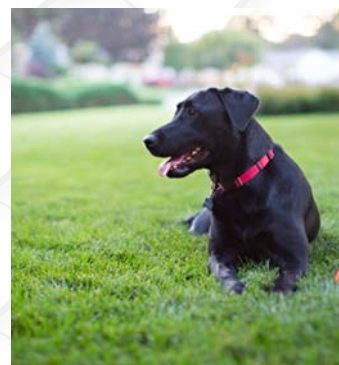

Ideal for lawn repair; lay with seed, lay over instant turf, level and lay over your existing lawn.

SEEDED LAWNS

- ~ Sow seed directly into the rolled-out CoverLawn.
- ~ An affordable way to achieve a hybrid lawn.

INSTANT LAWNS

- ~ Install directly over sodded lawns.
- ~ Easy to install.

EXISTING LAWNS

- ~ Simply mow down your existing lawn and install.
- ~ Add strength to your natural grass.
