

# 5 Ways Time Tracking Software Could Save your Business \$100,000+ per year.

## By Safeguarding You From Time Theft

Did you know that buddy punching costs american businesses **373 million annually** in stolen labor?

Thanks to our innovative [facial recognition technology](#), buddy punching is no longer possible! Only pay staff for the hours they are scheduled and clocked in for.

## By Protecting You From Lawsuits

Don't be a statistic! In California alone lawsuits rest break compliance violations tipped the scale at **1 billion dollars**.

Our software protects you [from these types of lawsuits](#), by using meal break enforcement rules, and customizable surveys!

With our software, employees have to sign off on breaks and worked hours - leaving a digital trail protecting you from a lawsuit.

## By Automating Punch In Rules

The owner of 13 [Booster Juice](#) locations was shocked when she realized she was losing **\$91,400 per year** due to unperce employee clock in and out times.

With automation rules - the clocks are automatically adjusted to reflect approved schedules, saving her nearly six figures a year.

## By Integrating with Payroll

A full time bookkeeper or payroll person can cost up to **\$65,000 per year**.

Eliminate that cost when you streamline clocked hours directly into payroll; running payroll with the click of a button. [Time tracking software that integrates with payroll](#), puts payroll back into the hands of the owner, and eliminates the risk of manual errors.

## By Giving you Sales Vs Labor Data

Our integrated time tracking software, helped our client [Tim Hortons](#) franchisee save **3% a year on labor**, by giving him the ability to measure his sales against labor. Consider this, if the entire 3 billion dollar grossing Time Hortons chain did this, the company would save **\$90,000,000** per year. You read that right, 90 million.

## A system that works best together
