

**WINCHESTER HOSPITAL AWARDS WINCHESTER REHABILITATION & NURSING CENTER
CASE MANAGER WITH GOLDEN KEY AWARD**

Winchester Hospital recently presented Karen Griswold, RN, a Case Manager for Salter HealthCare's Winchester Rehabilitation & Nursing Center, with the Golden Key Award for her work eliminating unnecessary hospital readmissions. As a Skilled Nursing Facility working to ensure patients and families receive the best possible care, Salter works every day to keep patients from returning to the hospital. However, recently, Griswold went out of her way to ensure that a newly discharged patient was able to stay in her home by putting a plan in place to ensure the patients' blood pressure stayed at a healthy level. "It truly does take a village to keep people in our community healthy so we love collaborating with hospitals, families and home care providers," said Robert Driscoll, Chief Executive Officer for Salter HealthCare. "We are incredibly proud of Karen and are honored to be recognized for patient care."
