Care Chemicals

## General characterisation

### Chemical description

Sodium Laureth-2 Sulfate, approx. 70 % active

### Mol weight

382 g/mol

## Labeling information

### INCI name(s)

Sodium Laureth Sulfate

## Active ingredient information

### Ingredient

Sodium laureth sulfate

Sodium laureth sulfate

### CASR-No.

68585-34-2

68891-38-3

### Remark

Most common description

REACH registration

## Product properties

### Appearance

White to off-white paste

### Example of use

Texapon® N 70 NA is used as a primary surfactant in shampoos, bath products, and personal cleansers, as well as in dishwashing and light duty detergents. The inclusion of ethylene oxide offers enhanced mildness compared to standard sodium lauryl sulfate while providing good flash foam characteristics and good viscosity response. Texapon® N 70 NA is shipped as a high-active (~70 % FAES) flowable paste, which offers the formulator advantages in terms of reduced freight costs, less in-plant handling expense, maximized storage efficiency, and the ability to produce more concentrated formulations. Some special handling and dilution equipment is required.
