

Pietra Fitness Business Card

How-To

You can find the editable Pietra Fitness business cards in your Instructor Portal under [Marketing Materials](#).

You can edit the PDF directly within your Browser, or save to your computer and edit from there.

The front of the card has the editable fields:

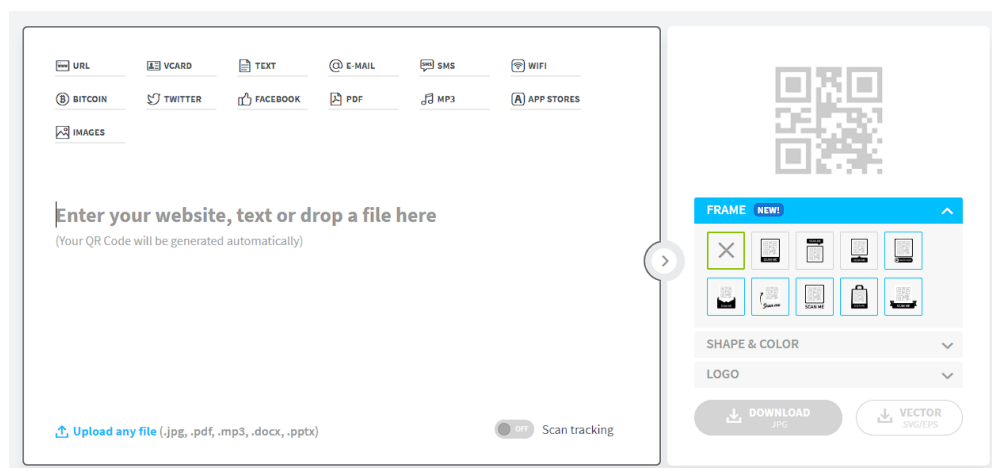

- First Name
- Last Name
- Title
- Email
- Phone

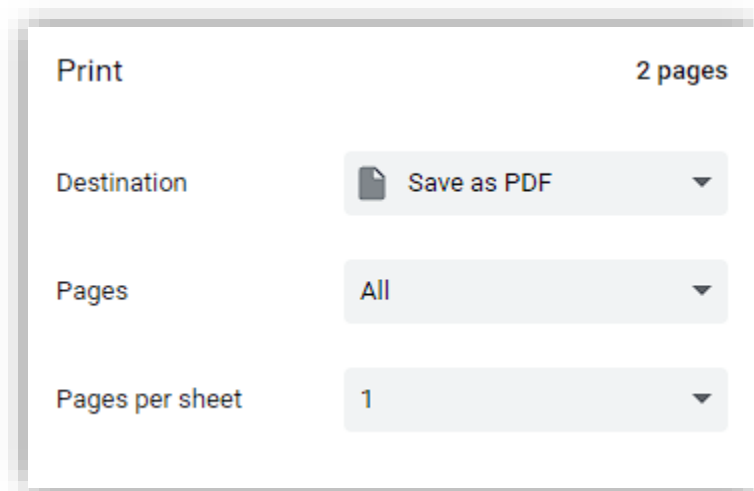

The back of the card has the option to add your own personal QR code (it pastes over the default blue one). If you do not add your own QR code, the default QR code to www.pietrafitness.com will remain when saved/printed.

There are many free QR code generator sites online (ex: www.qr-code-generator.com). Go to one, create your QR code with your personal [Pietra Fitness affiliate link](#), save the QR code as an image, and this is what you can paste into the editable PDF. (If you want a certain color QR code, you will need to use a photo editing app.)

Because this is an editable PDF, to finalize your changes, the best way is to select 'Print', and choose 'Save as PDF' as your printer destination. Now your business card is locked and ready for you to send off to a printer. (If you print without locking in you edits, no worries, none of the text box borders or anything like that will show when printed.)

Example of final product:
