HiredScore

HiredScore seamlessly integrates in real-time to enhance your SAP Success Factors experience. Harness the true potential of your HR data for greater agility, speed, and impact.

Leverage AI to Augment Your Investment—Not Replace It

HiredScore optimizes talent processes and increases utilization of existing data by intelligently providing actionable recommendations and insights in the moments that matter most, empowering you to improve the recruiter, hiring manager, and candidate experience and outcomes.
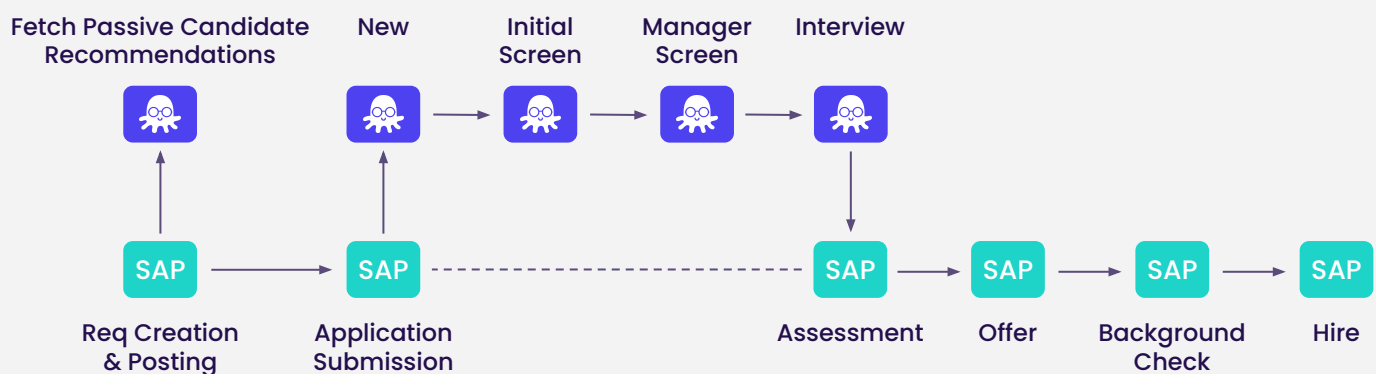

Maximize Your SAP Success Factors Investment

Leverage artificial intelligence, automation, and deep integrations across your entire technology stack to unlock a holistic understanding of talent, putting your data to work in new and impactful ways.

Optimized to Your Workflows

Unlock the full potential of SAP Success Factors by adapting and optimizing processes and data to connect the dots across your tech stack in accordance with your specific business processes, needs, priorities, and goals.

Seamless End-to-End Experience

Switching to SAP Success Factors?

Maintain & Leverage Your Most Important Candidate Data with Hiring Memory
Switching up your HR tech stack? There's no reason you should sacrifice the candidate data and insights you've developed over the years. HiredScore empowers HR teams to utilize data from an archived ATS to source qualified candidates no matter where the future takes you.
