The Fund's annual operating expenses shown above are effective 8/1/21 through 7/31/22. Gross Expense Ratio reflects the total annual operating expenses paid by the Fund. Net Expense Ratio reflects waivers, reductions, reimbursements, and the limitation of certain "Other Expenses." Expense caps and/or fee waivers are reevaluated annually. There is no guarantee that the investment adviser will continue to cap expenses after the expiration date. Please see the current prospectus for detailed information.

<sup>1</sup>Class I shown. The 30-Day SEC Yield represents the net investment income earned over the 30-day period ending on the above date and includes any fee waivers and expense reimbursements. It is an annualized rate calculated under a methodology prescribed by the Securities and Exchange Commission (SEC). Yields for other share classes will vary. <sup>2</sup>Performance shown prior to share class Inception Date is hypothetical and is that of Class I shares (12/19/11 Inception date), restated to reflect applicable service and/or 12b-1 fees. Advisor Class shares are sold at net asset value (NAV) without an initial sales charge and do not include a CDSC. Performance reflects any applicable fee waivers and expense reimbursements. If a sales charge had been deducted, the results would have been lower.

For performance data current to the most recent month-end, call Pacific Funds at (800) 722-2333 or go to PacificFunds.com/Performance. Performance data quoted represents past performance, which does not guarantee future results. Current performance may be lower or higher than the performance quoted. The investment return and principal value of an investment will fluctuate so that shares, when redeemed, may be worth more or less than the original cost. All share classes may not be available at all firms, and not all investors may be eligible for all share classes.

Morningstar calculates a Morningstar Rating<sup>™</sup> based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance, placing more emphasis on downward variations and rewarding consistent performance. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. The top 10% of funds in each category receive five stars, the next 22.5% receive four stars, the next 35% receive three stars, the next 22.5% receive two stars, and the bottom 10% receive one star. Morningstar Ratings for other share classes may have different performance characteristics. © 2022 Morningstar Investment Management, LLC. All Rights Reserved. <sup>3</sup>Ratings received from S&P®, Moody's, and/or Fitch and measured on a scale that generally ranges from AAA (highest) to D (lowest) and may change over time. The higher rating is used when rating agencies rate a security differently. All ratings are converted to the equivalent S&P major rating category for purposes of the category shown. <sup>4</sup>Includes bonds and floating-rate loans.

### Historical Sector Allocation

**About Principal Risks:** All investing involves risks including the possible loss of the principal amount invested. There is no guarantee the Fund will achieve its investment goal. Corporate bonds are subject to issuer risk in that their value may decline for reasons directly related to the issuer of the security. Not all US government securities are checked or guaranteed by the US government, and different government securities are subject to varying degrees of credit risk. Mortgage-related and other asset-backed securities are subject to certain rules affecting the housing market or the market for the assets underlying such securities. The Fund is subject to liquidity risk (the risk that an investment may be difficult to purchase, value, and sell particularly during adverse market conditions, because there is a limited market for the investment, or there are restrictions on resale) and credit risk (the risk an issuer may be unable or unwilling to meet its financial obligations, risking default). High-yield/high-risk bonds ("junk bonds") and floating-rate loans (usually rated below investment grade) have greater risk of default than higher-rated securities/higher-quality bonds that may have a lower yield. The Fund is also subject to foreign-markets risk.

**You should consider a fund's investment goal, risks, charges, and expenses carefully before investing. The prospectus and/or the applicable summary prospectus contain this and other information about the Fund and are available from your financial professional or [PacificFunds.com](http://PacificFunds.com). The prospectus and/or summary prospectus should be read carefully before investing.**

**Bloomberg 1-3 Year US Government/Credit Bond Index** is a performance benchmark of US investment-grade government and corporate bonds with maturities of one to three years. Indexes are unmanaged and cannot be invested in directly. Further, they hold no cash and incur no expenses. **Duration** measures a fund's sensitivity to interest-rate risk where the longer a fund's duration, the more sensitive, and vice versa. **Maturity** of a debt instrument, refers to the specific period of time until final payment (principal and any applicable interest) is due.
