Past Performance is not indicative of future results. Returns reflect reinvestment of dividends/distributions. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance quoted. Performance current to the most recent month end may be found at www.PacificFunds.com/performance or by calling 1-800-722-2333. It is an annualized rate calculated under a methodology prescribed by the Securities and Exchange Commission (SEC). Yields for other share classes will vary.

²Performance shown prior to share class Inception Date is hypothetical and is that of Class I shares (12/31/10 inception date), restated to reflect applicable service and/or 12b-1 fees. Historical Sector Allocation

Investing involves risk. Principal loss is possible. The Fund is subject to liquidity risk (the risk that an investment may be difficult to purchase, value, and sell particularly during adverse market conditions, because there is a limited market for the investment, or there are restrictions on resale) and credit risk (the risk an issuer may be unable or unwilling to meet its financial obligations, risking default). High-yield/high-risk bonds ("junk bonds") and floating-rate loans (usually rated below investment grade) have greater risk of default than higher-rated securities/higher-quality bonds that may have a lower yield. The Fund is also subject to foreign-markets risk.

Investors should consider a fund's investment goal, risk, charges and expenses carefully before investing. The prospectus contains this and other information about the fund and can be obtained at www.PacificFunds.com. It should be read carefully before investing.

Bloomberg US Aggregate Bond Index is composed of investment-grade U.S. government and corporate bonds, mortgage pass-through securities, and asset-backed securities. Indexes are unmanaged and cannot be invested in directly. Further, they hold no cash and incur no expenses. **Duration** measures a fund's sensitivity to interest-rate risk where the longer a fund's duration, the more sensitive, and vice versa. **Maturity** of a debt instrument, refers to the specific period of time until final payment (principal and any applicable interest) is due.
