## OUR LASER SOURCES

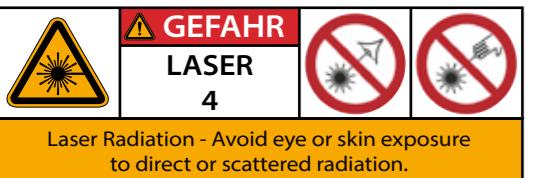

AUXXOS provides complex laser technology from our in-house development - designed to be as intuitive and user-friendly as possible for our customers. From the first contact to the application at your site, we always think laser from your perspective. Together, we look at your requirements and recommend the right laser source.

Our laser systems are not simply ready-configured products. They are tailored to your requirements and fit into your industrial processes. The highlight: All laser systems from AUXXOS are modular and thus freely expandable via plug&play. Power, cooling and pulse frequency are configured for your process requirements.

With AUXXOS laser systems you get a well thought-out product from real laser enthusiasts.

- + Easy processing of demanding materials
- + Customized interface and controller
- + Optional integrated scanner controller
- + Simultaneous pulse triggering of multiple lasers in a network
- + Highest pulse-to-pulse stability, efficiency and outstanding performance
- + Maintenance-free

## LASER PULSED / CW MODULATED

+ High-precision cutting, welding and drilling lasers  
+ Precise pulse shaping and modulation

## LASER MOPA

+ High-precision material removal, drilling and marking lasers
