

# Engineering Services

***With more than 45 years of HV experience, we know what works in the field.***

Whether you need a front-end engineering design, value-added engineering, a partial package for an RFP, or a full construction package, our team is ready to help. We also offer electrical studies, from Fault Current Analysis to Arc Flash Hazard Analysis and more.

## Get a High Quality Design

Work with our team to get the design and standards you need. Our experience includes:

- Civil Engineering
- Structural Engineering
- Transmission Line Design
- Relay Protection & Control Design
- Substation Design

## Renew Your Electrical Studies

Ensure the safety of your staff and equipment. We perform refresh studies so you can remain compliant with standards and know your equipment is functioning properly and safely.

## Get a Subject-Matter Expert

Need to free up your team or looking for a subject-matter expert? Our civil, electrical and structural PEs are licensed to work in all 48 contiguous states.
