

HerdWhistle™

HerdWhistle™

Gate Access

HerdWhistle Gate Access is a system to count, track, and identify herds of cattle as you run them through pens or alleyways on your farm.

Save on Handling Costs

Skip the chute with automated counting and tracking of each individual animal as you move them through your gates.

Export Records You Can Trust

Monitor your export gates to create a precise, time stamped, record of cattle loaded into trucks.

Instant Inventory Verification

Verify which exact animals are entering or exiting a pen with timestamps of when they were last detected.

\$4,999 + \$34.95/month

Features

- Count, track, and identify hundreds of animals at once
- Receive daily email reports
- Option for solar and wind power
- Simple DIY installation
- Compatible with UHF RFID ear tags

HerdWhistle™

HerdWhistle™

Water Access

HerdWhistle Water Access is installed at your water troughs to keep track of pen attendance all day, every day.

No Need for the Chute

Automatically count and identify every individual animal from inside the pen, saving you time and money.

Identify Missing Animals

Review your attendance reports and identify animals who are missing from their home pen.

Keep Pens Properly Stocked

Find animals placed in the wrong pen and quickly move them back to their home pen for optimal performance.

\$4,999 + \$34.95/month

Features

- Count and identify all animals in the pen
- Receive daily attendance reports via email
- Option for solar and wind power
- Simple DIY installation
- Compatible with UHF RFID ear tags
